TREASURER'S REPORT	vi

TO THE CLASS OF 1899 :

I present herewith a report of your progress from 1909 to 1914. The stories of some include also the ten years prior to 1909, especially those who did not answer before.

Since 1909, the following have died: Louis Albert Best, Challis Bowker, Robert Edward Burke, Sherman Campbell, Howard Clapp, Thomas Keith Faxon, Frederick William Harley, Frank Herbert Ford Holt, Charles Roswell Howe, Joseph Albert Jones, Charles Robert Lawson, Charles Nicholas McCall, Henry Everett O'Brien, Max William Oliver, John Morris Rogers, Jr., George Leverett Stowell, Jr., Louis Thornton Wilson and Walter Pellington Winsor, Jr. Stories of their lives are included wherever I was able to get in touch with any of the family or intimate friends.

Of those who have not answered nine are lost, as follows: Francis Victor Alexandre, John Joseph Colbert, Benjamin Taber Creden, Charles William Hardy, Cicero Adolphus Henderson, Charles McKey, Thomas Stead Ross Nelson, Ralph Slye, William Couillard Thompson. I should welcome information as to their whereabouts.

I acknowledge with thanks the assistance of A. Terry of the College Office in getting information from the records there, and also with even more than usual emphasis and gratitude, the invaluable assistance of Henry Thompson, whose energetic and most willing coöperation has been indispensable.

In closing I want again to thank all those who by their prompt answers to my periodical requests for information, help to bring us all closer together and maintain the unity and enthusiasm which has always characterized our class.

ARTHUR ADAMS, Secretary.

ARTHUR ADAMS

Born	<i>Quincy, Mass., May 20, 1877.</i>
Parents	<i>John Quincy Adams, Fanny Cadwallader Crowninshield.</i>
School	<i>Hopkinson's School, Boston, Mass.</i>
Years in College	<i>1895-1899.</i>
Degrees	<i>A.B., 1899.</i>
Unmarried	
Business	<i>Banker.</i>
Address	<i>(home) Quincy, Mass. (business) 135 Devonshire St., Boston, Mass.</i>

In February, 1910, the City Trust Company of which I was vice-president was consolidated with the Old Colony Trust Company and I became a vice-president of the latter company, along with W. B. Donham '99 and J. R. Wakefield '88. In June of that year I resigned, to take charge of the Boston office of The American Sugar Refining Company with the title of Assistant Treasurer. That company was at the time just beginning to recover from its unpleasant situation in the public mind and the people at the head of it then were able, high-minded and absolutely honest. I took up my duties without any previous experience in mercantile business but I found the officials and others connected with the company most agreeable associates, and the work of reorganizing the office and meeting a new lot of customers most interesting. After a year and a half however an opportunity was offered to become vice-president of The New England Trust Company, the oldest in Massachusetts, which was so attractive that I reluctantly gave up my connections with the Sugar Company and my resignation took effect January 1, 1912. I took a two months' vacation, about half of which was spent on a trip to the West Indies, including two days at the Panama Canal, thence touching at Venezuela, Trinidad and many of the islands of

the Caribbean Sea. At Trinidad I found Jim Rorer '99 who was most hospitable and quite unchanged in looks since college days. On March 1, 1912, I began my work at The New England Trust Company and am still there. My vacations have been spent mostly on the water and my interests are the same as five years ago. I took part in the Spanish American Sonder Class races in 1910 for the Taft Cup on the "Harpoon" designed by E. A. Boardman. She won the cup. I am not married but have three god-children: James C. Howe, Jr., Frederic R. Nourse, Jr., and Francis B. Richardson, whose names will be found elsewhere in this report. Member: Somerset, Tennis and Racquet, Exchange, Eastern Yacht Club, Quincy Yacht Club, Harvard Club of Boston, Harvard Club of New York, and the Harvard Union.

Since writing my story for the last report nothing of interest has happened to me. In 1912, I got much interested in the Taft and Roosevelt controversy. I was a hot Taft man, and worked hard for him here. I was nominated and elected as one of the alternates at large from the state of Massachusetts to the Republican convention at Chicago. It will be remembered that year that on account of there being nine persons running for the eight places as delegates at large for Massachusetts pledged to Taft, many votes were thrown out, because many Taft men voted for nine, when they should have voted for eight. In consequence of this mistake, the eight Roosevelt delegates were elected., and I found myself an alternate for a Roosevelt man. I believe this is the first time in the history of conventions that this has happened. At the convention the eight Roosevelt delegates refused to vote for nominee for President, and Mr. Elihu Root, the chairman, therefore called upon the alternates to vote for them. This was the first time in this country's history that such a situation ever occurred. I got my chance to vote for Taft at the convention and I was and am well satisfied with what little I could do for him. I am still fond of sailing and go down to Maine each year in my 30-foot waterline sloop "Arabian." Member: Worcester Club, Worcester Harvard Club, Tatnuck Country Club, Boston Yacht Club.

During the construction of the Cambridge Subway, the annoyance of the digging and the diversion of traffic forced me to move to 16 Garden St., next door to Dr. J. L. Hildreth, with whom I was associated for five years. I am serving my fourth consecutive term as commodore of the Hingham Yacht Club, and my second as chairman of the House Committee of the Boston Yacht Club. I have just been elected president of the Yacht Racing Association of Massachusetts succeeding Arthur Adams' brother in that position—my motto being, “keep it in the class if you can't keep it in the family.” I am a director of the New England Hospital for Women and Children. After the nerve-racking and wrecking days of the decennial were over, I decided to do something quiet for a while, so I bought a seat on the Boston Curb Exchange. It was such a great contrast, that after three years, I sold the seat again. On February 3, 1913, I took the greatest step in a man's life, and was married, thereby escaping the fate which has been mapped out for some few '99 men. In order to be true to the class, I am living at Harvard Terrace, off Harvard Ave., and shall probably be there when the duo-decennial comes around. As I know the majority of '99 men smoke, I am now in the cigar business, and ready at any time to furnish cigars, etc., from four for a nickel up to two dollars apiece. As the smoke of one of my own cigars has just gotten in my eye, and caused temporary blindness, I cannot see to write more, so good night, and as one F. White says with "Thwee Ninety-Nines and thwee times thwee," I will close.

Since 1909, I have continued the practice of law at the same place as before. The firm name now is Peabody, Arnold, Batchelder and Luther. In 1909 I ran for the board of aldermen in Salem, Mass., and was defeated. From November, 1907, to January, 1911, I was law librarian of the Law Library of Congress and of the Supreme Court. Since that date, I have been a director of the Legislative Drafting Association of New York, a non-stock corporation organized by a group of lawyers devoting their entire time to an effort to improve the methods of preparing and drafting statutes. For the past three years, we have been carrying on in connection with Columbia University a Legislative Drafting Research Fund which has been endowed for a period of five years. Our work consists of research in legislation and in the organization and procedure of administrative departments, and in the application of the results of this research to the actual drafting of bills for legislative committees, individual legislators, public officials, or private organizations carrying on propaganda in a particular field. Our purpose is to furnish to such persons technical aid on the law side in order that the necessary policies may be determined upon by them and, when determined, may be translated into constitutional, precise and effective statutes. I have written: "Index Analysis of the Federal Statutes" (joint author). Member: American Bar Association, American Political Science Association, Legislative Drafting Association, New York; Cosmos Club, Washington, D. C.

In this concern, which was incorporated in Connecticut as The Thames River Specialties Company, I hold position as vice-president and treasurer. Our location,

I resigned as vice president of The Idaho Irrigation Company, Limited, on July 1, 1909, and opened an office in Boise, Idaho, for the private practice of engineering. I formed a syndicate of Cleveland capitalists to take over the two water companies supplying the city of Boise together with two ditch companies controlling early water rights in the Boise River. I organized the Eastern Oregon Irrigation Company with rights over 35,000 acres of fruit lands in Oregon. I designated and installed the water works systems at Mountain Home and Meridian, Idaho, and designed the system for Downey, Idaho. I made field studies for the Beaver River Power Company, developing power on the Malade River in Southern Idaho. In the winter of 1910 and 1911, I was given charge by the Governor and State Land Board of Idaho of the complete investigation of the entire canal and storage system of the Twin Falls North Side Land and Water Company, covering about 300,000 acres, over 500 miles of canals and laterals and two storage dams and reservoirs. I had 42 engineers in the field all winter and report was filed with the State Land Board and the North Side Settlers Association. I was connected with various other water power, irrigation and municipal work. I assisted in organization of the Idaho Society of Engineers, and was elected its secretary and edited the first number of its annual Journal. In November, 1911, I accepted call to position of engineer in charge of the improvement of the Neponset River under the Massachusetts State Board of Health, which position is now held with construction headquarters in Hyde Park. I unfortunately missed the decennial, as I left for South America in March and was gone about nine months during which time I went to Brazil, Uruguay, Argentine and through the Straits of Magellan to Chile. Then I came up the long dreary west coast and home through Panama. In 1910, work took me to Europe for about three months, and again in 1911, I had another three months in Europe, starting with Spain and Portugal following the northern coast of the Mediterranean, through France and Italy, then across to Greece, Turkey and Roumania, and back through Germany and England. I am still with the Submarine Signal Company. I have not done much of interest the last five years except for having taken an active part in several other international yacht races with Germany, Spain, and Canada, and I am pleased to say that my representatives on the different

American teams were also on the winning side. In the summer of 1909 we raced Germany and the "Ellen," owned by C. P. Curtis, '83, won the Governor Draper cup, the second prize. The next year Mr. Curtis made me a present of this splendid boat and I certainly had great fun racing her. In 1910 I designed and steered the "Massachusetts," a syndicate boat built for the defence of the Seawanhaka Cup against Canada, in which we were successful in three straight races. My crew was the finest I have ever had the pleasure of sailing with, consisting of Eliot Wadsworth, '98, J. L. Saltonstall, '00, and my brother Dick, '00. If anybody wants the best, get those boys. That same year I designed for C. F. Adams, 2d, the sonder boat "Harpoon;" under Mr. Adams's skilled handling she went through the season's racing undefeated and topped off by winning in straight races the President Taft Cup in a series against the Spaniards. Our secretary, Arthur Adams, sailed with his brother in this series. I felt pretty good that fall I can tell you. Again last summer, 1913, I was mixed up in another international contest. This time against Germany. The boat was the "Sprig," designed for J. L. Saltonstall and crewed by "Salty," my brother and myself. We had a very satisfactory preliminary season, cleaning up the best sonder class fleet that had yet been built on this side of the pond and the other for that matter. She had the speed and was the first selection for the American team. In the final races for the Wilson Cup against Germany, fate was against us and we were only able to contribute one first place in five races, although our team won in straight races. I shall never quite get over the disappointment of this series, as I know we had the boat and were unable to show it.

Outside of this excitement, during the summer my life has been that of the quiet family man, taking the train for Boston in the morning and returning to my home at Beverly Farms in the afternoon both summer and winter, since our decennial. However, enjoying the country as I do this is not a hardship and I expect to continue along these lines for some time to come. Member: Somerset and Harvard

Clubs of Boston, Eastern Yacht Club of Marblehead, winter associate member of the Myopia Hunt Club of Hamilton.

In the spring of 1912 I competed for and won a place on the American fencing team that represented the United States in the Olympic games at Stockholm. I was appointed captain of that team and we crossed on the S. S. Finland with the American party headed by Col. Robert M. Thompson and James E. Sullivan. We certainly had a fine trip. After the games I visited London and Paris and returned to New York about the middle of August, having been away two months.

This last summer, as the architectural business was very

inactive, I took a long vacation in the woods of Nova Scotia. During the ten weeks of my stay there I lived in the open and slept a good part of the time on the ground. We had good trout fishing and some shooting. At present most of the architects with whom I am acquainted are quietly waiting for the much heralded business boom that the wise heads in Washington have promised us. I am working on a translation into English of the French book *Reglement d'Escrime* (Fencing Rules) Fleuret, Epie, Sabre, approved by the French Ministry of War for the French army. It will be published by the Amateur Fencers' League of America and used as a manual by the members of the league. Business	<i>Mining.</i>
Address	<i>(home) Georgetown, Mass.</i> <i>(business) Poza, Sonora, Mexico.</i>

About four years ago, I decided to discontinue the practice of law, which was constantly becoming more distasteful to me. At this time an opportunity was offered to join friends in the development and operation of mining properties in Mexico. I have been thus engaged up to the present time. During this period, I have done little that would be of general interest. Modesty forbids me to tell some of the things they have done to me. However, as I expect a real Harvard man for our next president, instead of a Princeton "débutante," I may have more details for the next class report.

I have been here until the present, and have spent my time in the bond department. Since my last report my family has increased, with the arrival of two little boys, one now approaching the age of four and the other about two years of age. My last five years have been happy ones with no great deeds to record. I have had in that time perhaps my full share of sorrow in the loss of my father and my wife's mother. In the fall of 1910, I was called to Westtown School to

take up the work of a teacher there, who had died just after school opened, and for two years I taught English and Latin in this, my home school. Then in 1912, I entered the Book Department of Strawbridge and Clothier, one of Philadelphia's great department stores. I am still there, endeavoring to serve my friends as well as I can, and I have returned to Lansdowne to live. During nearly every summer, since 1896, I have shared with my father and mother, and some of my brothers and sisters in the care and management of an exceedingly pleasant summer camp for everybody, first at Lake George, then at Thirteenth Lake, in the Adirondacks, then at Raquette Lake, and now for three years at Indian Lake. I consider myself fortunate to be able to get away from the store business for nearly three months of out-door life every summer. I have written a few book reviews and other short articles for our local denominational papers. A paper read before the Philadelphia Booksellers' Association has recently been printed in the Bookseller, News Dealer and Stationer, and, in part, in the Publisher's Weekly. Since the last report I have had a studio in Boston and a summer studio in Magnolia, Mass., and devoted most of my time to portrait-busts and medallions. Our decennial souvenir was the first actual medal I ever made, but my work in this line is now well enough known to be invited to all the large international exhibitions. The winter of 1910-1911 I spent in Rome, Italy, where, among other things, I modelled a 7 1-2 foot figure, representing an ideal type of American college athlete in the act of rubbing down. While there I was invited to lecture on the processes of sculpture to the students of the American Classical School and was able to illustrate with the bronze casting and marble cutting which were being done at my studio. I returned to America via Paris and London for the spring and summer exhibitions. In September, 1911, I entered a model in a national competition held by the University of California for the purpose of selecting a new design for its scholarship medal, and was unanimously awarded first prize. The Art Commission of Boston, with the approval of the Mayor, appointed me to make the four 16-foot figures for the facade of the new Boston City Hall Annex, on Court St. These statues were modelled during the summer and autumn of 1913 and were set in place in January, 1914. They are female figures rep-

representing Justice, Charity, Education, and Industry (to these I added a '99 baby—look up there, if you don't believe it!). So far as I know, these are the largest decorative figures to be cast in cement stone. At present I am finishing the modelling of the bronze doors for the new Forsyth Dental Infirmary for Children in the Boston Fenway; panels for the children's entrance doors I have already finished. An interesting commission which I have in hand is a large bronze tablet in strong relief for the facade of the new office building of the Fletcher Savings and Trust Company, of Indianapolis, Ind. Since January 1, 1913, I have been instructor in architectural modelling at Harvard. I am now designing a combined studio and house to be located on Garden Terrace (opposite the Botanical Gardens) in Cambridge, and expect to make that my headquarters after next summer. I have kept up my interest in amateur acting, largely in connection with the Toy Theatre, Boston, where I have appeared a number of times. My work has been shown in the following exhibitions: American Numismatic Society, International Exhibition, 1910, (invited); International Exposition of History and Art, Rome, 1911, International Section (passed by the jury), American Section (invited); Kansas City Art Institute, 1912, special exhibition of my work only (invited); Copley Galleries, Boston, 1913, special exhibition, etc. (invited); Boston City Club, 1913, special exhibition, etc. (invited); Boston Architectural Club, 1913, special exhibition, etc. (invited); Paris Salon, 1913 (passed by the jury); International Exposition at Ghent, 1913 (invited); Società degli Amatori e Cultori di Belle Arti in Roma, 1914 (invited); Pennsylvania Academy of Fine Arts, 1914 (passed by the jury); John Herron Art Institute of Indianapolis, Ind., 1914, special, etc. (invited). "A Christmas Fantasy," is a play written and acted by me at the Toy Theatre, Boston. Member: Harvard Club of Boston, Boston Architectural Club, Copley Society, American Numismatic Society, Morgan Horse Club of New York, Joel Chandler Harris Memorial Association (honorary member).

PAUL BURRAGE

Born	<i>Chestnut Hill, Mass., May 20, 1877.</i>
Parents	<i>Charles Henry Burrage, Lydia Love.</i>
School	<i>Newton High School, Newton, Mass.</i>
Years in College	<i>1895-1899.</i>

Business	<i>Insurance Broker.</i>
Address	<i>(home) 21 Falmouth St., Belmont, Mass. (business) 29 Central St., Boston, Mass.</i>

Since the publication of the last report the two most important events have been my marriage, as indicated above, and the death of my father in September, 1913, in his eighty-ninth year. My mother is still living with two sisters at the old home at Chestnut Hill where I lived until I was married. I have one brother, George D. Burrage, class of '83, who also lives at Chestnut Hill and who has two daughters at Radcliffe at the present writing. As I am a member of the New England Historic Genealogical So-

ciety, I am interested in family history. Any classmates who would like abstracts from any genealogy are very welcome to ask me to procure them. My father was the thirteenth and youngest child of Captain Josiah Burrage of Leominster and Ruth Kilburn of Lunenburg, Mass. As all these thirteen children married and had large families themselves my relatives are nearly as numerous as the sands of the seas. My mother's people were Quakers living in Philadelphia, and besides her own name of Love the other principal names of her ancestors were Evans and Ridgeway. I keep up my interest in athletics and attend most of the football, baseball and other games. I am a member of a small canoe club on the Shawsheen River in Billerica, Mass., where I greatly enjoy canoeing and camping and the out-of-door life generally. Next summer I shall be glad to show any classmates who are interested how near Boston there can be a spot so wild and secluded. I am taking a three-year course in Insurance Engineering, similar to the course now held at Harvard, in which the chief points are the History and Theory of Insurance, Prevention of Fires, and Construction of Fireproof Buildings, and the Analysis of Policy Conditions from the viewpoint of the Loss and of Court Decisions. I place all kinds of insurance with a great many different companies. There are two, however, in which I am particularly interested, the Boston Insurance Company for fire, marine and automobile insurance, and the Massachusetts Bonding and Insurance Company for all the so-called casualty lines. I have recently formed a partnership with Harold C. Read and Grafton W. Potter, under firm name of Burrage, Read and Potter for the conduct of a general insurance business with offices at 28 Central St., Boston. Member: New England Historic Genealogical Society, Harvard Musical Association.

Since our decennial, I have, in addition to my work as a merchant, been interested in the Hennepin Holding Company, of which I am vice-president, and the Walker-Burton Company, in which I hold the office of secretary. These companies control central properties in the city of Minneapolis. As both companies have carried on extensive building operations during the last four years, much of my time has been devoted to this work. My recreation has been secured by continuing to further advance the interest of amateur sports in the Northwest. I have been honored by the election as Commodore of the Minnetonka Yacht Club, president for four years of the Minneapolis Tennis Club, and honorary member of The Garrick Club of the University of Minnesota. I was chosen to serve on the committee to re-construct the Constitution and By-Laws of the United States National Lawn Tennis Association, and have twice been elected as the Northwestern representative of the executive

committee of the United States National Lawn Tennis Association. The sport of ice-boating and ice-boat racing on Lake Minnetonka has been highly developed by a small group of men of whom I have had the pleasure of being one.

Address (*home*) Park Ave., Bronxville, N. Y.
 (*business*) 25 Broad St., New York, N. Y.; Gramatan Bank Building, Bronxville, N. Y.

Since May, 1909, I have been living in Westchester County, which bounds New York City on the north, and now have a permanent home there in the village of Bronxville. In 1911, I was appointed attorney for the Village of Bronx-County, under retainers from public bodies and others; so that I now have a branch office at Bronxville. My practice in New York City shows some tendency to fit my preference for cases in the courts as distinguished from office work. In January last, my firm dissolved when Mark Hyman went into the department of Justice at Washington. I am soon to go into a new firm for the announcement of which I have delayed writing this chapter till now, when further delay is forbidden. I gave the lectures on New York Practice in the Harvard Law School in 1910-1911 and 1912-1913, and

shall do so in 1914-1915. In past years my Saturday trips to Cambridge for these lectures have given me glimpses, on the way, of '99 men about Boston, and little reunions with them. I hope for more such next winter. Member: Loyal Legion of the United States, New York Commandery, Harvard Club of New York.

I do not know as there is much more to add, beyond the fact that I am, alas, growing stouter, and a small bald spot is appearing on my cranium, due I am sure to the ever increasing difficulty of hanging on to what I have been able to acquire, by fair means or foul. I am and have been greatly interested in the movement for better roads and have been closely associated with the movement in this state in nearly all of the organizations. I have also been interested in the better farming movement of the north-west, and have been closely associated with the movement in this state. I wish also to say that I was lately elected a vestryman in our church, and I point this fact out with pride, to show that there is still hope for me. I have not as yet written any books or plays although I have always felt it would be an easy thing to do, (perhaps), and any articles that may have appeared in print under my name have been reports of talks, political, economical, and otherwise, that I have attempted to make. I will say that these

always have a very strange look to me when I read them in print. I am quite active in tennis, golf, etc. Member: Elk Clubs, Masonic Organizations, Knights of Pythias and other like, which I seldom have time to attend. Golf Clubs, Hunt Clubs, Tennis Clubs, State organizations in the way of good roads.

I left Harvard the spring of '96 on account of ill health and wandered around Colorado and Utah for a year. Much against my will but due to insistence of relatives I entered the Class of 1900, Rutgers College, of which my grandfather was a former president. In the spring of '98 I enlisted in 3rd New Jersey Volunteers, Co. D for the Spanish American War. I saw no service and was honorably discharged in November the same year by telegraphic order of the Secretary of War. I was graduated from Rutgers College, June, 1900, and engaged in free lance newspaper work 1900 to 1902. In July, 1902, I accepted a position with San Diego Union, San Diego, Cal. In June, 1903, I passed the examination for commission as lieutenant in United States Marines. From January, 1904, to April same year I had command of the Marine Guard on U. S. Prison Ship Southery at Portsmouth, N. H.; from April to December of the same year I was attached to the U. S. S. Kentucky, Brooklyn Navy Yard. On December 10, 1904, I

sailed for Colon, Panama, with the Panama Expeditionary Battalion of Marines, being given command of Company C. In May, 1905, on account of trouble in Santo Domingo I embarked aboard the U. S. S. Dixie with a company for Santo Domingan waters. I returned to the United States in August of the same year and was attached to the U. S. Receiving Ship Hancock at the Brooklyn Navy Yard. Some time about January 1, 1906, I was transferred to Headquarters Barracks at Washington, D. C. where later I became adjutant of the post. In September, 1906, on account of insurrection in Cuba, I embarked aboard the U. S. S. Texas with the 5th Expeditionary Battalion of Marines for Havana. I was given command of 3rd Company of Casuals, and invalided home to United States with company December 1st the same year. I resigned on account of ill health December 18. In the year 1907, I was employed in the Auditor's office of Los Angeles Ry., Los Angeles, Cal. In the spring of 1908 I became member of field engineering force U. S. Reclamation Service, Salt River Project, Phoenix, Ariz. When the field force was disbanded I was made head timekeeper of various camps along the Grand Canal. In 1909, I prospected and engaged in various engineering prospects in the State of Chihuahua, Mexico, and later was employed in the Resident Engineer's Office G. H. & S. A. Ry. Co., El Paso, Texas. The following spring I decided to go back East and get civilized, and reaching Kansas City, accepted a position with the Kansas City Southern Ry. Co., in the Chief Engineer's office. On March 1, 1911, deciding civilization was a failure so far as I was concerned I went to El Paso and offered my services to Francisco I. Madero. I was sent out to join the revolutionary forces in the State of Sonora under Juan Cabral. I was the first machine gun man in the state and later given command of the American Sharpshooters. I participated in several engagements and skirmishes. I returned to the United States in July the same year and became engaged in prospecting and mining in Southern Arizona, making Bisbee headquarters. I was taken into the general office of the Calumet and Arizona

Mining Company from which I resigned in July, 1913, when my brother and I purchased a farm in Arkansas. I am here today but cannot tell where I shall be tomorrow. I have written several magazine articles, mostly fiction.

Since last accounts I have continued to practise law and have worked on the side with Ensign, '99, Stratton, '99, and "Billy" Garcelon, L.S. '95, on the Newton Times, a paper which Garcelon started in Newton, and still conducts. In August, 1913, Governor Foss appointed me on the Commission to Investigate Drunkenness in Massachusetts and the best means of correcting or controlling that evil. With my colleagues we made the investigation ordered and reported to the Massachusetts Legislature in January, 1914. On December 9, 1913, I was elected mayor of the city of Newton. I received the Democratic nomination and was endorsed by citizens. The campaign was a non-partisan one and my opponent was Allston Burr, a Harvard '89 man, who, by the way, is a mighty fine fellow. It was some contest, but the '99 men in Newton rallied to my support and put me across a winner. It was another '99 victory. I was inaugurated in January and am now on the job. Member: Middlesex Club, Harvard Club of Boston, Nonantum Athletic Association.

THOMAS WOOD CLARKE

Born	<i>Utica, N. Y., June 19, 1878.</i>
Parents	<i>Wallace Clarke, Sarah Elizabeth Scoville Wood.</i>

Years in College	<i>1895-1898.</i>

Unmarried	
Business	<i>Physician.</i>
Address	<i>(home) 136 Park Ave., Utica, N. Y.</i> <i>(business) 240 Genesee St., Utica, N. Y.</i>

The habit I set myself by writing the voluminous history of my life for the last report, five years ago, stuck to me for something over a year, with the result that while assistant editor of the Medical Record in New York I literally came near writing myself to death. At the time of the Decennial I had just been appointed a clinical assistant in the Vanderbilt Clinic in New York and had been given charge of a room in the department of diseases of children under Dr. Holt, and shortly afterwards was appointed assistant in diseases of children in Columbia University. The manifold duties of my editorial work, teaching and practice proved

a bit too much for me and in the summer of 1910 I was ordered by my physician to get out of New York and take a long rest. I came home to Utica, rested up, got perfectly well (and far too fat for a self-respecting coxswain) saw a good opening for a children's specialist in Central New York and settled down in Utica to practice medicine. I am still here. Some two years ago I became interested in several social and philanthropic organizations and have been rather active since in such matters. At present I am secretary of the Board of Directors and consulting physician to the Associated Charities of Utica, an association I helped to organize. I am first vice-president, deputy commissioner, member of the Court of Honor and surgeon to the Utica Council, Boy Scouts of America. Two years ago a committee was organized to help to reduce the infant mortality among the babies of our poorer districts. I was appointed physician in charge of the first Utica Babies Pure Milk and Health Station, and last summer, the work having broadened out along other lines, I was appointed medical director of the Baby Welfare Committee of Utica. I am treasurer of the Medical Society of the County of Oneida, a member of the committee on Medical Research of the Medical Society of the State of New York, and attending pediatricist to Faxon Hospital in Utica. After my wanderings in search of medical experience, I think I am now permanently established in Utica, and any '99 man who drifts into Central New York will receive a warm welcome if he will look me up. As the temperature here last week was twenty-six degrees below zero, the inhabitants of Utica feel the necessity of living up to its reputation of giving people warm welcomes. I have written the following articles for medical and scientific journals since the last report: "The Problem of Elemental Life," *Science*, November 18, 1910; "Sulph-haemoglobinaemia, With the Report of the First Case in America," *Medical Record*, December 3, 1910; "The Diagnosis and Treatment of Meningitis in Children," *New York State Medical Journal*, June, 1911; "The Diagnostic Value of Gastric Analysis in the Digestive Disturb-

ances of Infancy," Archives of Pediatrics, August, 1911; "Vaccine Therapy in Medicine," New York State Medical Journal, May, 1912; "The Value of Discipline in the Care of the Sick Child," Transactions of the New York State Nurses' Association, 1912; Also New York State Journal of Medicine, August, 1913; also Clifton Medical Bulletin, October, 1913; "Infant Welfare Work in Small Cities." Special Bulletin, New York State Department of Health, 1913. Member: The Medical Society of the County of Oneida, The Medical Society of the State of New York, The American Medical Association, The Utica Medical Library Association, The Pediatric Club of Central New York, The American Association for the Study and Prevention of Infant Mortality, The Society of Sanitary and Moral Prophylaxis, The Harvard Club of New York City, The Fort Schuyler Club of Utica, The Yahnundasis Golf Club of Utica.

Since the occasion of our decennial celebration, which excellent affair I was unable to attend, my personal history contains very little of extraordinary interest or importance. In 1909, I was engaged in the surety business in New York City, and acting as assistant to the president of the United States Fidelity and Guaranty Company. Two years later, I resigned to become resident vice-president, at New York, of the Massachusetts Bonding and Insurance Company, which position I now occupy. I am also president of the Surety Underwriters' Association of New York City. Outside of my business experience my existence has been varied by six or seven trips to the Pacific Coast and Southwest. I am one of those who have gone back to the soil, living the simple life from six in the evening until eight the next morning, on a farm this side of the Connecticut line, in a hamlet known as Rye, where also dwell several good Harvard citizens. My days are spent in toil—my nights in rest. Saturday afternoons, I play golf—not successfully, but philosophically. Member: Harvard Club of New York, Harvard Club of Boston, Apawamis Club, Insurance Society, Surety Underwriters' Association of New York, Pennsylvania Society.

Except that I am five years older and considerably busier, I know of little to add to the story I wrote five years ago. My X-ray work has greatly increased, and now occupies a large part of my time. My only publications have been a few case reports. In June, however, I expect to read a paper before the Massachusetts Medical Society on "The X-ray Diagnosis of Tuberculosis of the Lungs." For recreation I have the societies named below and a yearly vacation on an island in Casco Bay, Me., uninhabited save for the stag crowd which I accompany. There is little of a biographical character to add to the report of the class published in 1909, wherein the name, "Amanda McLeon Cory," should be corrected to read "Amanda McLean Cory." I should not insist on this correction save for the fact that it involves continued pleasant relations with my mother-in-law. In 1912, I was the Progressive candidate for Governor of Colorado on the ticket headed nationally by Theodore Roosevelt, and Hiram W. Johnson. In that election in Colorado, the Progressive party won second place, the Republican party running third. Recently, I have announced my expected candidacy for the same position on the same ticket in the fall of 1914.

During the autumn of 1909 Mr. Arthur D. Hill, the district attorney, under whom I was serving was defeated at the election and his term of office ended in November. However, as he and I were engaged in the trial of the so-called "steel conspiracy cases," a trial which lasted by the way for 13 weeks, we were appointed special counsel for the Commonwealth to finish the trial. On November 26 I took the oath of office as assistant secretary of the treasury under Secretary MacVeagh, and in the middle of December, upon the completion of the steel case trial I went to Washington and took up my new duties, under a recess appointment. Some time in January or February, 1910, my regular appointment was confirmed by the Senate. My assignment in the department was the supervision of the collection of the revenue from customs. I continued in this position through the Taft administration and up to August 1, 1913, under President Wilson and Secretary McAdoo, when my resignation was accepted. During 1911 I was investigated by a committee of the House of Representatives owing to a muckraking article which had been published about me in Pearson's Magazine. However, the committee, although politically opposed to the administration, failed to find any gold dust or "long green" sticking to my person. During the period I was connected with the customs service we succeeded in clearing up most of the large fraud cases and also in reorganizing the service so that the number of in-

dependent collectors and districts was reduced from 162 to 49. After leaving the treasury department I took a vacation for a couple of months and then returned to the practice of the law in Boston, where I share office expenses, but not profits (if any) with Harry Sherburne. Andrew Peters, the Weed Brothers, et al., at 905 Exchange Building. I have written various articles upon the Tariff Act of 1913 and its administration features; and also an article for an English magazine upon the United States Treasury Department. Member: Tavern Club, Tennis and Racquet Club, Longwood Cricket Club, Somerset Club, Harvard Clubs of Boston and New York, Country Club, and the Metropolitan Club of Washington.

If I am a Harvard man it is in sentiment only, not in experience, since my stay at Cambridge was limited to eight months, I think. The Harvard Faculty and students were

at that time distinctly inimical to new-comers of Western education and speech. Being only seventeen years old, lonesome and over-studied I suddenly yielded to a long-time passion for the stage and left Cambridge to join in New York a theatrical company that was performing a one-act play which I had written and sold. After four years of success on the stage I entered my family business at Buffalo, N. Y. The Cutler Desk Company, of which I have been president for ten years, is known in every commercial centre of the world. My business duties have not prevented me from continuing many studies which always interested me, notably: history, archaeology, greek, social economy, etc. Sometimes I sell my views on these subjects to magazines. I am president of the Cutler Desk Company, Buffalo, N. Y.; secretary and treasurer of the Cutler Dry Kiln Company, Buffalo, N. Y.; executor of the A. C. Smith Estate, Buffalo, N. Y.; executor of the E. A. Cutler Estate, Buffalo, N. Y.; director of the Buffalo Chamber of Commerce, Buffalo, N. I hereby comply with your request to give an account of myself since graduation. If I have been reluctant about it attribute it neither to false pride nor modesty, but to the sense of my own insignificance which creeps with age. On the brink of forty! And with a boy old enough to enter Har-

vard in the course of a few weeks, spite the opinion of the Hon. Governor of South Carolina regarding "Cubans and other inferior races." After leaving "the best of all places" in June, 1899, I spent three months trying to convince my dear good father that the only way to cure the severe nostalgia which had taken possession of me would be nine months of Memorial Hall diet; or, the family as well as '99 would soon have cause for mourning. The result was positive. I came back to Cambridge until June, 1900, when much to my sorrow—though not desperate, I left again, for the Northwest where I spent several months driving stakes for the Canadian Pacific R. R. Thence I came to Cuba and served with locating and construction parties building the Central R. R. along the Island. 1901 found me again in New York to recover from another little touch of nostalgia. In May, 1901, I came back to Cuba and entered the Government Service as assistant engineer of Public Works. In May, 1904, I went to St. Louis, Mo., as government delegate to the Good Roads Convention held in connection with the exposition. I went again in September as technical commissioner to the St. Louis Exposition. I took part in fencing events at the Olympic games and won the broad sword championship; also with Van L. Post, of New York, and Ramon Faust, of Paris, formed part of the team which won the foil championship. I was appointed chief engineer of Santiago Province in 1905; in 1906 acting inspector general of public works; in 1911 city engineer; and finally in October, 1913, chief engineer, district of Havana. As you can see there is nothing scandalous about my record one way or the other. Above all things I have never been and am not a politician—in the bad sense—of course. We have organized a Harvard Club in this town in which at present I hold the office of secretary. I regret to say that it has not shown much activity due to the reduced number of members and their being scattered throughout the Island; we do manage to gather around the festive board once a year to give three cheers to Percy D. and other mighty pillars of Fair Harvard. Blessings to ye all from your classmate.

Since the decennial report I have added to the population of the Territory of Hawaii, one more boy and one girl. I am still holding the same job, namely, president and manager of the Hawaiian Pineapple Company, and am vice-president of the Haiku Fruit and Packing Company, Limited, a concern engaged in the same kind of business on the island of Maui, one of the Hawaiian group. Since the decennial, the two concerns have together packed 2,530,000 cases of canned pineapple or over 60,000,000 cans, and as this is a commodity the price of which has gone down rather than up, and therefore has not tended to increase the cost of living, I have managed to keep fairly busy.

Immediately after leaving college I tried selling books on the subscription basis, but as the title of "Book Agent" did

not suit me, I decided to do something more agreeable. I obtained, in the fall of 1899, temporary employment with the Lawyers Surety Company, where I stayed until March, 1900, when my employment was terminated through no fault of mine. I obtained employment from the American Bonding Company of Baltimore at its Boston office, 92 State St., and stayed with that company until September 15, 1911, resigning to take position as manager of the Surety Department of the Maryland Casualty Company, in their Boston office, 75 Kilby St. I stayed with them for thirteen months, and resigned to take the general agency for the State of Massachusetts, for the Equitable Surety Company, and opened an office at 29 Central St., Boston, for the general conduct of their business, and to do all branches of insurance, and I am still so employed. I have been connected with three advertising concerns in Boston: James T. Wetherald, Ellis and Dowst, and H. B. Humphrey Company. In the autumn of 1913, I entered the office of Small, Maynard and Company, general book publishers, Boston, and of this house I am now manager. My ambitions are, first, to land a "best seller" for the house; second, to put over one of my own. For some time, I have

been devoting my spare hours to writing magazine fiction, of which I have found a market for a part—enough to encourage me to go on. I haven't tackled a novel yet, being now in the "novelette" stage, but I have hopes. This year, I have been teaching Business English in Boston University College of Business Administration. I tried keeping chickens at one time—had incubators and brooders and setting hens and all the rest—and my friends took to calling me "Hen." The name still sticks, though I have long since disposed of the chickens. I hate to talk about myself, but it's kind of fun to write something the editor's fairly sure to print. I have written: "Random Notes of Boston," six historical chapters, with illustrations by J. A. Seaford, 96 pp. cloth, Boston, 1913, H. B. Humphrey Company, publishers. Various contributions, all fiction, in current magazines, including *The Red Book*, *Lippincott's*, *Collier's Weekly*, *Munsey Publications*, *Short Stories Magazine*, etc. Member: Harvard Club of Boston, Harvard Club of New York, Exchange Club of Boston, Boston Press Club, Woodland Golf Club, Bostonian Society, The Authors' League of America, Veteran Association, First Corps Cadets, Winslow Lewis Lodge A. F. and A. M., Boston.

I regret that my achievements since leaving Harvard, have been so mediocre as to be entirely unworthy of mention. Ill health, due to overwork while in college, has prevented my accomplishing much that I had hoped to do. After leaving Harvard in the summer of 1900, I became purchasing agent for John P. Squire and Company, Boston, remain-

ing with them nearly four years. Ill health compelled my resignation from this position, and my retirement from active business for nearly two years. My resumption of work was with the steel construction firm of Post and McCord, New York, doing outside work. I remained with this firm three and one-half years. Then I joined the advertising department of the National Cloak and Suit Company, New York, leaving them at the end of a year and a half, because of ill health. Last May, I again started in business, taking a position in the advertising department of The Charles William Stores, No. 59 John St., Brooklyn, N. Y., where at present I am employed.

Business	<i>Lawyer.</i>
Address	<i>(home) 2608 Hibernia St., Dallas, Tex. (business) 1704 Commerce St., Dallas, Tex.</i>

I am practising law for a living, and working in the Socialist party and local politics as a means of making conditions better for people than they are. The Socialist movement in Dallas is a vital and growing force; it has furnished me keen incentive, ample opportunity for expressing what individuality I have, has "broken up" no homes so far as I know, and produced neither anarchy nor "dividing up" in this locality. There were several books, as I thought, and many scholarly articles seeking to be written by me when I left college, but my energy has been spent otherwise—in the not less intense though less distinguished work of a Socialist agitator. About the only offices of honor I have held are in the Socialist local. I have many friends and acquaintances among the working class of people, and

am pretty cordially hated, I suppose, by the other class. December 23, 1904, Octavia Nichols, A.B. University of Texas 1904, and I were married. We have one little girl, named Octavia Nichols, who is a source of deep happiness to us, and who makes us believe that the world will be much better when our children take it over from the days that are past.

Six months in England showed it would require a long residence there to do business successfully, so I went to France, where business conditions were more favorable. I made my headquarters in Paris, where my son was born in June, 1912. While there, I made business trips to Belgium, Holland, Germany, and Austria, and a pleasure trip to Switzerland. In December, 1912, I returned to New York. In February, 1913, I went back to Paris, for a four months' trip to get my successor started. I continued to live in New York City until the first of May, 1913, when I severed my connection with the art firm of M. Knoedler and Company and started in business with T. H. Robinson, an Englishman, for many years with the London office of my old firm. We have established a London office for buying, while our outlet for our art purchases is in Philadelphia. My summers are spent in England, where we've had a house the past three summers on the hills above the Thames and near Marlow. My chief relaxation is travel and I know of no more interesting places to go than to the Cathedral cities of Old Spain. Member: Harvard Club of New York, Racquet Club of Philadelphia.

Looking back upon the five years that have passed since the last account was written, I cannot recall that during this time my name has appeared often in headlines,—either of the Boston Transcript, or yet of the Police Gazette. If I have not served my country mightily in the view of the whole American people, neither have I made myself conspicuous as an undesirable citizen. (Of course no one would be so innocent as to suppose that by any process of evolution, or of involution, any '99 man could become an undesirable citizen; nevertheless I have thought it well to parade this point). No, the only crimes of which I am knowingly guilty are my failures to attend past reunions of the class of '99. In respect to these I throw myself upon the mercy of my generous classmates, who know how sufficiently I am punished by my remorseful reflections upon what I have thereby missed. Shortly before our decennial it happened that I married a wife, and therefore, (like the man in the parable), I could not come. I fear that after these fifteen years very few of my old class would now recognize me, not that time has much altered my appearance,—for I am told (Alas!) that this is not the case, but lest it has effaced me from their memories. Yet with God's help,—and my wife's, who has given her consent,—I shall be in Cambridge for the great quindecennial. And I trust that when they hear this my gentle classmates will not feel obliged to come to the round-up provided with shock-absorbers, nor clad in their wall-climbers and ten-league boots. Member: Harvard Club of Maryland, Medical and Chirurgical Faculty of Maryland, American Medical Association, Interurban Orthopedic Club.

You will pardon my delay in answering, but I have been in hopes that a belated inspiration would enable me to write something that might be interesting to the other fellows, but the effort fails me. The truth is that my practice has gone along in about the same usual course. I am using the same desk, the same pen and the same waste-paper basket (dilapidated but useful) as when I started my practice. I have made more friends than clients, among whom I number more debtors than creditors. And I will add that while I am not married, I still have my appendix, which are perhaps two things to be thankful for. All in all, the world seems bright and cheerful, especially today, which is the first pleasant day we have had in weeks.

Perhaps my long vacation spent in answering the call of the wild that came from New Brunswick, in the fall of 1908, had an unsettling effect upon me. At any rate, on May 10, 1909, I left the Chicago office of Goldman, Sachs and Company, and devoted my energies to improving my game of golf. After collecting a number of souvenirs of the game, I concluded to return to the business world. In February, 1910, as a beginning, I acted as bond salesman for Allerton, Greene and King, then newly established. In June, of the same year, I transferred to the Chicago office of Plympton, Gardiner and Company, New York specialists in railroad bonds. After gaining an additional six months' experience with them, in December, 1910, I opened an office under my own name for the purchase and sale of investment securities, and since that time, though the general investment business has been said to have been somewhat quiet, I am gratified that each succeeding year has shown me a substantial improvement over the preceding one. From 1909 till November, 1911, I continued with the Bay State Diamond Company in the capacity of vice-president and assistant treasurer. Then, as we did not seem to be able to make a success of that, I joined the selling force of Turner, Tucker and Company, 24 Milk St., Boston, and until January 17, 1914, sold stock for this firm through southeastern Massachusetts. On the last named date I joined the sales force of White, Weld and Company, 111 Devonshire St., Boston, and shall represent them hereafter in that territory known as "The Cape." In September, 1913, I moved "lares" and "penates" to Bridgewater, Mass., in search of health-giving country air and the simple life. Here I shall stay until called to go elsewhere. Mem-

I remained in Seattle, Wash., with the Northern Pacific Railway from April, 1908, until August, 1910. My principal amusement was work, although I found a little time for baseball and tennis during the summer. Baseball consisted of games between the Harvard and Yale Clubs of Seattle, and I am glad to say that in the three games in which I took part, the Elis were always on the wrong side of the score when the game ended. In the summer of 1909, I won the tennis championship of the state of Washington, and also the International Doubles with Sam. Russell, a Yale man, as my partner. In August, 1910, I was transferred to Zillah, Wash., as agent for the North Yakima and Valley Railway, where I remained until March, 1911. I was then appointed chief clerk for the Northern Pacific Railway, at North Yakima, Wash. In April, 1912, I was appointed agent for the Northern Pacific and the S. P. and S. Railway, at Pasco, Wash., and am still occupying that position. Pasco is not a particularly pleasant place of residence, especially in summer, as it is probably one of the hottest places in the United States. I hope, however, that my sojourn here will be limited, and that in due course of time, I may move along to something better.

Since 1909, I have been devoting less of my time to architecture, and more to city planning. In 1910, I was at the Ninth International Housing Congress in Vienna, as a dele-

gate of the United States Government. I have been lecturing twice a week for the last three years at Columbia University on City Planning. I assisted in the founding of the American Social Center Association, three years ago at Madison, Wis. I was a founder of a series of European Civic Tours. I am a member of the executive committee of the American City Planning Conference, a member of the town planning committee of the American Institute of Architects, a member of the city plan committee of the Merchants Association of New York; treasurer of the New York Chapter of the American Institute of Architects, and a director of the American Group of the Société des Architectes Diplômés par le Gouvernement Français. I am retained as city planning expert to the City Plan Commission of Newark, N. J., and to the City Plan Commission of Jersey City, N. J. For the city of New York, I was the secretary and director of investigations of the Heights of Buildings Commission, and of the City Planning Exhibition Commission. I was also the secretary of the Joint Committee on City Departments of New York, and a member of the advisory commission of a building code to the New York Board of Aldermen. In spite of this terribly serious minded list I seem to frivol and gambol like any other human being, thanks to my wife. I have written many reports for City Plan Commissions, and many articles on City Planning and allied subjects for magazines and newspapers. the practice of law. My health which had been giving me some trouble necessitated a prolonged rest, and for this reason the winter of 1911-1912, was spent at Asheville, N. C.; and the following summer at Ipswich, Mass. In the fall of 1912, I started the practice of law in Boston, Mass., and have been associated with the firm of Currier, Young and Pillsbury.

Business	<i>Teacher.</i>
Address	<i>Middlesex School, Concord, Mass.</i>

The years since 1909 have passed, outwardly at least, very uneventfully. Middlesex School continues to be the field of my labors, which include the teaching of mathematics and German, the coaching of hockey, tennis, and minor football teams, besides the manifold incidental questions and problems which are continually arising. The life, in spite of its isolation and apparent narrowness and monotony, is one of great diversity of interest. It would be hard to find a more wholesome mode of life, for it not only gives an opportunity for, but almost demands, participation in many forms of outdoor sport. The long vacations offer a delightful opportunity for change, which ordinarily I use largely for reading and study. From 1910-1912 I was president of the Association of Mathematical Teachers in New England.

I have lived on Staten Island (Richmond Borough, New York City) continuously since graduation. Admitted to the New York Bar in 1901, I have practised law in New York City ever since that date. I was active in politics from 1900 down to 1905. I performed active service on the legal staff of the state superintendent of elections, investigating and prosecuting offences against the elective franchise in New York City, during a period of four years or more. Later I served a further four years as an assistant corporation counsel of the City of New York. This was a civil service appointment pursuant to competitive examination. Since withdrawing from politics, I have practised law exclusively, specializing on corporation accounting, financing and conveyancing, also taxation and public utilities generally. I have written nothing for publication except a few newspaper articles upon political and economic subjects. I belong to no clubs and hold no offices of honor or trust except the treasurership of the Staten Island Unitarian Church of which I have been a trustee for about nine years. I belong to numerous charitable and civic organizations, and for many years was vice-president of the local Children's Society.

I entered '99 in its senior year and always felt more or less a stranger as far as class events were concerned tho' many '99 men whom I have met after graduation have urged me to go along with them on these important occasions. My senior year with '99 was much like a freshman year for me as I stayed in Cambridge in the Graduate School, teaching three years in the college, and entered the Law School, graduating in 1906. An apprenticeship in the office of R. W. Hale and work for Professor Stimson gave me a start in the practice of law, and later a partnership was formed with Jackson Palmer '05. In 1910, this was dissolved, the office at 6 Beacon St., Boston, being continued by me. During the same year, I leased the "Southboro Arms," then building, as a side issue. Whether I shall remain permanently in the hotel business (which is very attractive to me) is just now undecided.

Soon after our decennial, I began, in coöperation with other physicians, to work out methods for reducing the infant mortality. Work similar to ours at the Hill Maternity Clinic, was almost simultaneously but independently done elsewhere. The practical result of these various endeavors has been a marked reduction in the infant mortality in New York City in the last five years. In the autumn of 1910, ill health compelled me to give up my work. In Colorado Springs, where I spent two years, I was enabled, as a

member of the Rocky Mountain Harvard Club, to have some pleasant times with the western Harvard men. I also renewed my memories of History 13 during Professor Hart's term as Exchange Professor at Colorado College. Last summer I made a trip, mainly on foot, through parts of Scotland, Wales, and England; in the course of which I did not neglect visiting the Harvard house at Stratford. Two of our classmates had registered there the day before my visit. If ever the class finds it has more money than it can use, a present of some Harvard literature and photographs would satisfy the curiosity and stimulate the interest of many visitors to whom our college is little more than a name. Southwark Cathedral, a yet worthier Harvard memorial, still lacks the bronze doors to the Harvard Chapel. At present I am doing research work at the University of Würzburg. I find time, however, to study the customs of the German students here; and have been gratified to learn that they uniformly regard Harvard as "the" American University, though their ignorance of our ways is even more profound than is the American student's lack of knowledge concerning German university life.

I have nothing of especial interest to record since the great and only decennial except hard work. A law regulating osteopathy was passed in New Jersey in April, 1913, establishing it legally upon an educational and professional equality with medicine. This was an object I had wished for since I located in New Jersey, and I was pleased to receive from Governor Fielder the appointment as first osteopathic mem-

ber of the State Board of Medical Examiners. I have been interested of late in the treatment of catarrhal deafness, and am considering taking it up as a specialty. I was president of the New Jersey Osteopathic Society for six years, and am now a member of its executive committee. I hold the degrees of Ph.B. and A.M. from St. Lawrence University and A.B. from Harvard. For three years I was master in St. George's School, Newport, R. I. In the summer of 1902, I was elected to my present position as president of Oahu College, Honolulu, Hawaii. I attempted to do some civic and social work and at different times was president of the Civic Federation of Honolulu, chairman of the Honolulu Improvement Advisory Board, secretary of the Social Science Association, secretary of the Pacific Scientific Institution, secretary of the S. C. Armstrong Memorial Association, vice-chairman of the Hawaii committee 1910 convention American Association for the Advancement of Science, member of the Education Commission, member of the Executive Committee of the Hawaiian Branch of the Red Cross. But these ambitions and these honors have now passed from me. I am chairman of the Students Aid Committee of the Harvard Club of Hawaii, and am a member of the Hawaiian Historical Society, and of the Social Science Association. I am also a member of the University Club of Honolulu. I have traveled in Japan. I have written: "The Chinese in Hawaii," a chapter in "China and The Far East, Clark University Lectures, 1910," "Present Tendencies in Labor and Immigration, and their Significance," an address in Report of Lake Mohonk Conference on Indians and Other

Address	<i>(home) 62 Las Casas St., Malden, Mass. (business) 30 Kilby St., Boston, Mass.</i>

I have continued the drab existence of a suburbanite—slave to the eight o'clock train in and the five o'clock out. In between those tyrant hours (save on blessed Saturday), and on the only job I ever held, I have through the media of news items bulletined with alacrity and editorial comment ground out more sluggishly and painfully (to readers, too), sought to help elucidate for a very sophisticated clientele the plots, mysteries, intrigues, secrets and riddles of the most fascinating serial of modern literature—the ticker tape. Absolutely the only personal adventure to variegate this impersonal handling of alien happenings was an inglorious one last fall, into our local politics as a school committee candidate, being nosed out (I'll have to confess) by a '98 man. The only consolation (the voters needed none) was that the yellow flag distanced us both—thanks to votes of women by women for a woman, who led the ticket. [On his promotion to be an Associate Editor of the Boston News Bureau on January 1, 1911, the Boston Post said of him: "Mr. Griffin graduated from Harvard in 1899, and has been with the Boston News Bureau ever since. He wields one of the most graceful pens in financial journalism—one that is equally happy in verse, prose or statistics." Sec.]

In 1909 I was appointed assistant professor of Romance Languages in the Ohio State University, at Columbus, Ohio, and I hold this position at the present time. In 1910, D. C. Heath and Company published a French novel entitled "Dossia," by Henry Gréville, for which I prepared the introduction, notes, and vocabulary. My doctor's thesis (301 pages), on the above mentioned subject in French epic literature, was published by the University of Missouri, in July, 1911. The

summer of 1911 I spent mostly at Madrid and Paris. I traveled extensively in France Spain, and Italy, and visited also England, Germany, Switzerland, and the Tyrol. While attending the meetings of the Modern Language Association in December, 1913, I found great pleasure in revisiting Harvard, Cambridge, and Boston. At present I am a member of the Modern Language Association of America and of the Harvard Club, the Language and Literature Club, the Cercle Dramatique, and the chapter of the Phi Beta Kappa of Ohio State University. I have written: *Dosia*, by Henry Gréville, with Introduction, Notes, and Vocabulary by Theodore E. Hamilton Ph.D., assistant professor of Romance Languages in Ohio State University. D. C. Heath and Company, 1910. *The Cyclic Relations of the Chanson de Willame*, by Theodore Ely Hamilton, assistant professor of Romance Languages in Ohio State University. The University of Missouri Studies. Published by the University of Missouri, July, 1911.

Since our Decennial, some notable things have happened to me. After my marriage in 1910 I returned to America, took up my residence in North Andover, Mass., where I have since bought me a home with a few acres of land on which I

can play at "farming." I am still engaged in the merchandise brokerage and importing business, established by my father, to which I succeeded in 1909, and by its means am struggling to find sufficient funds with which to live and at the same time resuscitate my run-down farm. I shall be glad to exchange confidences, condolences and cuss words with any other '99 "back-to-the-lander"—as well as to "swap lies" about milk records, balanced rations, crop rotations, etc. I should also like to impress upon our banking and legislative contingent the necessity for some system of rural credit. God knows the *amateur* farmer needs it!

comfortable and happy one. Member: New Church Club, various Masonic bodies.

PERCY DUNCAN HAUGHTON

Born	<i>Staten Island, N. Y., July 11, 1876.</i>
Parents	<i>Malcolm Graeme Haughton, Mary Nesbit Lawrence.</i>

Business	<i>Stock Broker.</i>
Address	<i>(home) South St., Charles River, Mass. (business) 31 State St., Boston, Mass.</i>

Continuing my decennial story, I have attempted to live an even tenor of existence in Boston. By far the most notable event of my life took place on May 15, 1911, when I married Mrs. Richard Lewis Howell of New York. Next in importance was the birth of my daughter Alison Lawrence on April 21, 1912. I have also two stepdaughters aged 9 and 7. In 1910, I left the Old Colony Trust Company, where I was employed as assistant secretary to become associated with the firm of Hamlin, Nickerson and Company, stockbrokers. Since 1908, I have been coach of the Harvard football teams. I have also been greatly interested, during these years, in the promotion and continuance of the Harvard Varsity Club. I have endeavored to keep in close touch with various other sports, but have succeeded in only one instance in winning the "Blue Ribbon," namely the Double Racquet championship of United States with H. D. Scott '98, in 1913. Hereafter my interests in business and at home will preclude any further participations in athletic stunts, and moreover I am bald and nearing forty. I have written sundry articles on sport for magazines and newspapers. Member: Tennis and Racquet Club,

Boston; Exchange Club, Boston; Harvard Club, Boston; Harvard Club, New York; Dedham Polo and Country Club, Harvard Varsity Club, Cambridge; The Bivouac Club. [It is perhaps worthy of note that since Haughton began coaching Harvard football teams, Yale has beaten them but once. His record against Yale football teams as player and coach is four victories, one defeat, and three tie scores.—Sec.]

HAROLD BUCKMINSTER HAYDEN

Born	<i>Boston, Mass., Oct. 5, 1876.</i>
Parents	<i>Horace John Hayden, Harriet Putnam.</i>
School	<i>Cutler School, New York, N. Y.</i>
Years in College	<i>1895-1899.</i>

Unmarried	
Business	<i>Manufacturer.</i>
Address	<i>(home) 17 State St., Framingham, Mass.</i> <i>(business) Dennison Manufacturing Company, Framingham, Mass.</i>

After graduation from college, I went to work in New York City as a clerk in the controller's office of the New York Central Railroad, of which my father was then second vice-president. In March, 1900, I took a similar position in the treasurer's office of the Cleveland, Cincinnati, Chicago and St. Louis Railway, also in New York City. In October, 1900, I went abroad with two friends, traveling through France, Spain, Italy and Germany, returning to this country in April, 1901. Immediately after my return I went to Framingham, Mass., where I entered the Dennison Manufacturing Company as a machine tender in the shipping tag department. Here I received a liberal education in the intricacies of carrying paper stock, cleaning machinery and finally operating plain and printing tag machines until August, 1902, when I was made head of this department. In February, 1906, I was given charge of the printing department and in March, 1908, the electrotype department. These

several departments constituted a division of the factory and the position carried with it the title of division superintendent. In November, 1910, I was appointed assistant to manager of works, who was then Henry S. Dennison, also of '99. In August, 1912, I succeeded Dennison as manager of works, which is my present position. My chief interest outside of factory duties has been the housing problem and for three years I have been working with a committee of the Massachusetts Civic League in framing tenement house laws for towns and cities of Massachusetts. The committee is now engaged in framing a general housing law for the state. In town affairs I have been on several different committees as well as on standing committees of our local Board of Trade, but have never coveted or been invited to public office. Member: Harvard Club of New York, Harvard Club of Boston, Massachusetts Civic League, National Housing Association, Framingham Board of Trade, Boston Chamber of Commerce, Framingham Civic League.

WILLIAM SOLOMON HAYES

Born	<i>Evans Mills, N. Y., Aug. 8, 1870.</i>
Parents	<i>Solomon Hayes, Lena Antoinette Young.</i>
School	<i>Watertown High School, Watertown, N. Y.; Phillips Academy, Exeter, N. H.</i>
Years in College	<i>1896-1899.</i>
Degrees	<i>A.B., 1899.</i>
Married	<i>L. Florence Burdick, Burlington, Vt., July 18, 1905.</i>
Business	<i>Teacher.</i>
Address	<i>(home) 10 Oxford St., Cambridge, Mass. (business) 502 East Broad St., Chester, Pa. (permanent) 36 Orchard St., Cambridge, Mass.</i>

In the summer of 1911, I broke away from South Dakota, determined to land a job in the East, or starve for it. For two years I did odd jobs, acting as substitute teacher here and there, tutoring some, translating various articles from the Italian and German for the Harvard Theological Review, correcting modern language papers for var-

ious Harvard instructors, and serving as proctor at Harvard examinations. Moreover, as always, I did a bit of independent thinking on my own hook, trying to find myself, and—well, maybe I came a trifle nearer succeeding than before. In the summer of 1913, I was appointed Professor of French and German at the Pennsylvania Military College, Chester, Pa., where I merely have to teach ten half-hour classes daily five days in the week, besides serving as Officer of the Day every fifth day, including Saturdays and Sundays, from 6.30 A. M. to 10 P. M. Lo! the lucky lobster! Meanwhile, the “thinking” has kept on after a fashion. At Christmas time, I conceived the idea. During the next six or seven weeks, I gestated it. In the middle of February, I brought it forth in perfected form. Its sub-title is, “A 10,000,000 Horse-power Idea.” I might just as well, perhaps, have made it 100,000,000, but I preferred to be modest about it. Doubtless it was modesty also that led me to adopt for pseudonym the term Thinker. Now wasn’t Thinker, a brilliant thought? It makes so evident what you’d like to be considered, while gracefully suggesting a good gibe to the envious and to capitious critics. Besides, was not the author of the Pilgrim’s Progress a Tinker? Like honest John Bunyan, I don’t give a tinker’s dam what they call me, provided I turn out something worth while. Therefore, to add to the hilarity of the nations, let it be known that the “old fish,” William S. Hayes, henceforth also to be known as Thinker, is about to rush into print. Like a mighty meteor he is to appear in the heavens of thought, to the bewilderment, if not the bedevilment, of the gaping groundlings. Whether he is to come down with a thud like a spent rocket or vanish into interstellar space, this deponent ventureth not to say. I have translated for the Harvard Theological Review several articles from the Italian and German, but did not consider the matter of any importance, so kept no detailed record of it. Perhaps, the editor, Professor James H. Ropes, can supply the details.

I am still teaching English at Harvard College, and am a member of the Faculty of Arts and Sciences. I am watching for the young ninety-niners, who will undoubtedly surpass all records. For several years I have been conducting large University Extension courses in English in Boston. After all, the best thing I have done for the college, I think, has been to carry to many hundreds of clerks, merchants, stenographers, teachers, railroad signalmen, station agents, machinists, and mothers some conception of the work and principles that the college stands for. Another activity

which interests me a great deal is lecturing on the drama, literature, art, and travel. For some years I have given series of public lectures on the modern drama under the titles *The Stage of Today*, and *The Art of the Theatre*, which have brought me into pleasant relations with many of the leading dramatists and actors. Some of the titles of my other lectures are: *Lincoln*, *Stevenson*, *Kipling*, *Ruskin*, *Modern Novelists*, *Ireland and Her Literary Revival*, *Italy*, *France*, *Paris*, *The Land of Scott and Burns*. The summer of 1911, I spent in France and that of 1912, in the British Isles. During the summer of 1914, I am engaged as director of a tour *esthétique* and lecture in Europe on the Renaissance, Gothic architecture, and literary and historical subjects. In this enterprise I am associated with such men of letters as Mr. G. K. Chesterton, M. Salomon Reinach of Paris, Dr. Guido Biagi of Florence, and Sig. Luigi Villari of Rome. I have written: "Specimens of Prose Composition," Ginn and Company, 1907; "Representative Biographies of English Men of Letters," Macmillan, 1909; "Selections from Sir Walter Raleigh," 1909; "Stevenson's Treasure Island," Ginn and Company, 1911; "Carlyle and Newman, in lectures on Dr. Eliot's Five-Foot Shelf," 1913; "The Art of The Theatre," 1913; "The Stage of Today," 1913. Address	<i>(home) 18 Osborne Road, Brookline, Mass. (business) 700 Harrison Ave., Boston, Mass.</i>

I left college at Christmas in my senior year, but the faculty, on my petition, allowed me to obtain my degree by taking the mid-year and final examinations without attending the lectures and class-room work. My leaving Cambridge was required by the illness of my father's partner, which, although without fatal termination at that time, made it appear necessary for me to get to work. The business I entered was the manufacture of paint brushes. The concern was then the John L. Whiting and Son Company, but since joined another old concern in that line, becoming the John L. Whiting-J. J. Adams Company. I have travelled in England, France, Italy, Austria, Germany, Russia, Finland, Sweden, and Denmark. Member: University Club (Boston), Harvard Club of Boston, Sons of the American Revolution, Society of Colonial Wars, Society of Mayflower Descendants, Massachusetts Fish and Game Protective Association, Niatous Club (Maine).

In January, 1910, I returned from New York to Kansas City, to join my father's law firm of Holmes and Page, the name being changed to Holmes, Holmes and Page, and became senior member thereof on the death of my father in November, 1911, succeeding my father as general counsel for Central Coal and Coke Company, Delta Lumber Company, Louisiana and Texas Lumber Company, W. R. Pickering Lumber Company, and Missouri and Louisiana Railroad Company, corporations with mines, timber, mills and railroads in Missouri, Kansas, Wyoming, Oklahoma, Arkansas, Texas and Louisiana, and as counsel for other corporations, to which class of work I have been specially addicted. My activities have been chiefly advisory in financial and other corporate affairs, with a great deal of litigation, under personal injury and anti-trust statutes, and of course, chiefly on the side of defendants—satisfactory work, but tending to make one cynical as to there ever being a just plaintiff, whether adorned with governmental insignia or clad in citizen's clothes. The only positions of honor or trust which I now hold are of private or testamentary origin. Favorite sports are smoking, gardening, sailing and sleeping. Most expensive is driving (and occasionally overturning) a six-cylinder motor-car. Member: The Country Club of Kansas City, University Club of Kansas City, Bar Association of Kansas City.

Since the publication of the last Class Report I have continued in the practice of surgery in Boston. In 1910 I became an Assistant in Surgery in the Harvard Medical School, and in the following year was appointed surgeon to outpatients at the Massachusetts General Hospital. I served in this capacity until the spring of 1912 when I resigned from the Massachusetts Hospital to accept a position as surgeon to the Peter Bent Brigham Hospital, then nearing comple-

tion in Boston. Being offered by the Hospital an opportunity to travel, I went to London in May, 1912 and spent the next four months, with the exception of a week spent in Germany, working with Professor E. H. Starling in the Physiological Laboratory of the University of London. In 1913, I spent two months traveling in England and then settled down to the practice of surgery in Boston. During the last year in addition to my service in the Brigham Hospital I have held the positions of surgeon to the Boston Dispensary and Associate in Surgery in the Harvard Medical School. I have written a number of articles on clinical and scientific subjects in medicine. My activities since writing for our decennial report have been along the same lines as described then. I am still with the Boston Ice Company as vice-president and manager. I have some personal interests in ice factories in Savannah, Georgia, and New Orleans, Louisiana, which have given me the opportunity of visiting those cities several times during the last four years. I have for several years shipped a large amount of fruit to South America, some of it packed in ice, and a larger amount in refrigeration. This business has developed rapidly since 1910. There is a great demand in Brazil and the Argentine for high-grade fruit from this country in the fall of the year. The lack of suitable transportation facilities makes it extremely difficult to meet this demand satisfactorily as there is only one line of steamers operating between the United States and South America whose boats are equipped for this business. There is however a rapidly increasing interest in the opportunities that South American trade offers, which I hope will result in other lines entering the field. Business	<i>Minister.</i>
Address	<i>(home) South Ave., Bryn Athyn, Pa.</i>

On June 13, 1909 I was ordained into the first or ministerial degree of the priesthood of the General Church of the New Jerusalem, and for the subsequent three years acted as instructor in the boys' high school at Bryn Athyn, making also bi-weekly visits to a small congregation in Baltimore. I taught French, German, Latin, Greek, Hebrew, Algebra, Geometry, Church History, and Religion to a va-

riety of grades. In May, 1912, I was ordained into the second or pastoral degree of the priesthood, and assumed definite charge of the society in Baltimore. This society has bought a plot of 13 acres of land at Arbutus in the suburbs of Baltimore and built a small frame building which is used as chapel on Sundays and as a school on week days. Altogether eight families have settled in that neighborhood and constitute a small New Church community. Thus a distinctive religious and social life is provided for, among those who acknowledge that Jesus Christ has made his second coming in the Writings of Emanuel Swedenborg; and the young are protected from the influence of a dead Christianity and a life of mere pleasure. In January, 1913, I was appointed to a professorship in the Theological School at Bryn Athyn, with "The Rites, Ceremonials, and Spiritual Signification of the Jewish Church" as my subject. In October, 1913, I was appointed a member of the General Council of the church. My work keeps me at Bryn Athyn the entire year, with the exception of the bi-weekly visits to Arbutus. I am secretary of the Bryn Athyn Academy Alumni. I have written: "The Fifth Commandment," "The Philosophy of Disease and Cure," "The Chaste Love of Sex," "The Arcana of the Hebrew Language," in *New Church Life*; "The Intellectual Difficulties of Homoeopathy," in *The New Church Quarterly*. A transcription and translation of Swedenborg's Latin and German Notes in his copy of Sebastian Schmidt's (Schmidius) Latin Bible (as yet unpublished). Member: The Swedenborg Scientific Association.

The balance of the year 1899, I devoted to travel, and also the greater part of the year 1900. During the years 1901, 1902, and 1903, I assisted my uncle in his real estate and other interests in Barre, Mass. In 1903, I entered the employ of the First National Bank of Barre, remaining in the service of the bank for nearly six years. Leaving Barre, in 1909, I was with private bankers in Boston, but devoted considerable time to travel. More recently, I have become interested in the efficiency systems of public service corporations, and am at present in the South, with the Southern Bell Telephone and Telegraph Company at its home office in Atlanta, Georgia. Only when living in Barre have I enjoyed the time and opportunity for public and other activities. While resident in that community, I was auditor of the Town of Barre, treasurer of the First Parish in Barre (Unitarian), president of the Barre Golf Club, and was an assistant to the M. F. My expectations of being married having been realized, the next thing was to get busy, renovate this my ancestral home and to see how much happiness, and incidentally shekels, could be coaxed our way. Life at Livermore Falls is not the same as State Street, Boston. The subway has not been extended so as to be of much personal benefit to us as yet; at times it is not so much a question of rapid transit as any transit. However, we are a long way in advance of State Street in most things. We are free to think and do very much as we please, the air is pure, you can run your auto as fast as you want to, or rather dare to; we look out on most of the surrounding landscape and gloat over its possession. The world from this point looks pretty good.

In the summer of 1912 I gave up the practice of law in Boston in order to take the position of "manager" of the Rockefeller Institute for Medical Research in New York City. Since then the duties of this very interesting position—duties which have been largely quite novel for me—have taken about all of my time and energy. In 1911 I arranged and published a volume of my father's uncollected essays under the title "Memories and Studies." I am at present collecting material for a biographical selection from his correspondence, and I shall be grateful to any former students of his who will send me letters or reminiscences which may have biographical or illustrative interest. Member: Tavern Club in Boston, Century Club in New York.

The years have slipped away so fast, I scarcely know they're gone,

I've traveled in the West a bit and planted out some corn,
Away down in Vaginny, where the watermelons bloom,
And the dusky, Southern matrons are spinning on the loom.
I've steeped my mind in Injun lore,—in Trappers, Scouts,
and such,

Who've roamed upon the prairies and dodged the red man's clutch.

I've lived with the frontiersman, the pirates, and the chap,
Who was a big adventurer and did not care a rap
For whizzing bullet, vapping blade, and frightful blunderbus,

When carried by an enemy who was a fighting cuss.

In fact I've had a bully time, I never have been vexed

I trust that you have been quite well,

Now—how have you lived?

NEXT.

I have written juvenile books entitled: "Famous Cavalry Leaders," "Famous Indian Chiefs," "Famous Scouts," "Famous Privateersmen," "Famous Frontiersmen." Member: Metropolitan Club, Chevy Chase Club, Harvard Club of Washington, D. C.

I was elected to the board of trustees of the New Hampshire Baptist Convention and later became 2d vice-president of the body, also the first president of the New Hampshire Baptist Fellowship for Social Justice, organized in 1910. In November, 1911, I became executive secretary of the Men and Religion Forward Movement at Springfield, Mass., and the following year came to New York City to take some courses in the School of Philanthropy, affiliated with Columbia University. While continuing these studies, I am in residence at Union Settlement on the upper East Side, on the verge of "Little Italy." Here I am director of men's and boys' club work. My especial purpose, both in my connection with the Men and Religion Forward Movement, and in my present position, is to study the approach of the church to the social movements of our day, particularly from the standpoint of the social worker. My conviction is that, while there is a rising tide of social interest in organized religion, there is great lack of knowledge on the part of most ministers of the actual steps necessary to adjust the work of the churches to the social needs of the different communities. It is my hope ultimately to make some contribution to this necessary adjustment.

During the past five years I have continued to live in Hingham, devoting myself in leisure hours to gardening and botanical studies. I am still in the publishing business as an agent of D. C. Heath and Company, in Massachusetts and Vermont. I travel from 15,000 to 18,000 miles every year, and have learned much about New England's much-abused railway systems from actual contact with the New England Lines. I have also learned what hotels to avoid. My work keeps me in touch with educational thought and progress, with most of which I am in hearty sympathy, but I do wish there were more Harvard men teaching in Massachusetts to offset some of the mis-judged and ill-balanced vocationalism which is seeking to run riot in educational circles. I am a member of the Boston City Club, and to balance this urban privilege I have become a director of the Hingham Agricultural and Horticultural Society; also New England Botanical Club, American Society of Colonial Families.

EDWARD BROWN LEE

Born	<i>Island Pond, Vt., Jan. 22, 1875.</i>
Parents	<i>Edward Payson Lee, Permelia Brown.</i>
School	<i>Boston Latin School, Boston, Mass.</i>
Years in College	<i>1895-1899.</i>

Married	<i>Margaret Emily Wilson, Kingston, Mass., Sept. 15, 1906.</i>

Business	<i>Architect.</i>
Address	<i>(home) 732 Millvale Ave., Pittsburgh, Pa.</i> <i>(business) 1310 Peoples' Building, Pittsburgh, Pa.</i>

After graduation my college training enabled me to decide to take a vacation at once. I did research work on the lakes and streams of Northern Vermont to find out if the fishing had been injured while I had been away. On being relieved on this point and the money having given out, I was forced to go to work, which I did in October, 1899, in the office of Professor H. Langford Warren, Boston, as architectural draughtsman. Less than a year of this work in the above city led me to believe that the only way to get a raise or a good job at my trade was to wait for somebody to die and as the architectural men in Boston seemed to be a hardy type I began to look elsewhere. I heard of a job in

Pittsburgh, Pennsylvania, with Alden and Harlow, architects, which I secured at a munificent advance and emigrated to the city of smoke in July, 1900. Here I worked on the drawings for the Carnegie Institute, a four million dollar job, and some large office buildings and fine work until October, 1901, when I made an incursion back to Cambridge to try for the Austin Travelling Fellowship at Harvard. This being not sufficiently guarded I succeeded in landing the prize, and after a short period in Pittsburgh to recoup my shattered fortunes, I sailed with a beautiful letter of credit for Italy in March, 1902. I traveled in Italy, France, Spain and England till August, 1904. These were the happy days. I was admitted to the Ecole Des Beaux Arts, Paris, in 1902, and finished work of second class. When the money gave out in July, 1904, I returned to Pittsburgh, and I won the Allegheny County Prize, \$1,000, in the Carnegie Technical School competition in that year. I formed a partnership to practise architecture entitled Billquist and Lee in 1905. This firm built a good volume of work, the largest operations being the Presbyterian Hospital, the Pennsylvania Reform School, and many fine residences, stores, apartment buildings, and hospitals. This firm was dissolved in 1910. Since then I have practised alone as Edward B. Lee, architect and have had a fair practice. Have built the White Garage, 1911. I was appointed architect for Thiel College, Greenville, Pa., in 1912, and architect of the Liberty Theatre, 1913. Since 1910, I have been associated with Palmer, Hornbostel and Jones, Architects, of New York, and have been resident architect in charge of their Pittsburgh work such as portions of the Carnegie Technical School, the University of Pittsburgh new buildings, the Alleghany County Soldiers' Memorial, and have (January, 1914) in association with the above firm won the competition for the new Municipal Building of Pittsburg to cost \$3,000,000. Member: Pittsburgh Architectural Club, president 1905, 1912, 1913; American Institute of Architects; University Club of Pittsburgh; Harvard Club of Western Pennsylvania.

I did post graduate work in the clinics of Vienna, Berlin and London from 1907 until 1910. After my return to America, I was associated with one of Chicago's surgeons, until the winter of 1911. During the period of this association, I was a member of the faculty of the College of Physicians and Surgeons of Chicago. In December, 1911, I came South to escape the cold of a Northern winter, visited Houston, was impressed by the city and decided to locate here. The climate of Mexico City continues the same as at the time of the Decennial report, but in other respects conditions have changed and for the humble pedagogue I am afraid the atmosphere is not quite so optimistic. For the past three years or so, various Caballeros have taken upon themselves the mantle of Don Porfirio with the result that Mexico has been in a Dickens of a stew and is still stewing. However, we are continuing the "watchful waiting" policy and getting all the fun possible out of the situation. I am happy to report that my riches have doubled since the Decennial, for then I had but one daughter and now I have two. Member: University Club, Mexico City; Country Club, Mexico City; F. and A. Business	<i>Architect.</i>
Address	<i>(home) 211 Pleasant St., Arlington, Mass. (business) 649 Massachusetts Ave., Cambridge, Mass.</i>

The years of 1909 and 1910 were not noted for any great change in either my social or business relations; no great successes or reverses until the last of 1910, when I had a very severe illness, (gallstones), necessitating a critical surgical operation, from which I was a long time recovering. I did practically no work in 1911, nor did 1912 show much improvement over the previous year. In 1913, I was quite busy the larger part of the year, and I am hoping the present year will see normal conditions return again. Last year I did two large buildings for Claflin University, Orangeburg, S. C., in addition to the regular run of office work. This year I am at work on a group of buildings for Acadia University, Wolfville, N. S. It is my habit to spend two or three months of summer each year at our summer home in "Lakelands," N. S., which I find enjoyable and very helpful in getting back my strength and vigor after the long grind at office work. My son Donald is a student

at Acadia University, and my daughters, Edith and Enid are students at the Arlington High School, as senior and junior, while my baby Muriel is in the Primary School, 4th grade, and will probably be in the High when the next life is written, if at all. We did not stay in Maine after all, but returned to Wrentham, Mass., where we lived until last November. We spent about a year rebuilding the house. Between the hours when I was bossing carpenters and cursing plumbers I wrote a book, called "The Spirit of American Literature." It was published last year by Doubleday, Page and Company; it has been praised by cranks, revolutionists, and other independent persons, and condemned, sneered at or ignored by the conventional and the respectable. From May to September, 1912, I

was executive secretary to George R. Lunn, Socialist Mayor of Schenectady. I resigned on account of Mrs. Macy's illness. Since January, 1913, I have been literary editor of the Boston Herald. Mike Farley is a good boss, but he is so busy that I don't expect to see him until we celebrate our Fifteenth. Speed the day! Member: The St. Botolph Club.

The result was a million dollar plant, which is without doubt, for its size, one of the most complete and unique buildings in New England. In June, 1912, I was called to the superintendency of the public schools of Milton, Mass., which position I am at present occupying. My tale is soon told. "Here I am; here I remain." Evidently my parish work, like the Philadelphia City Hall, isn't finished yet, nor likely soon to be so. But as I am one of the most fortunate of parsons, I am glad enough to continue as the minister of All Souls' Church in Greenfield, Mass. Though I haven't found a wife, I have found a farm, an estate which for expense eclipses the estate of matrimony. To spend my vacations on it, I have to spend them preaching to a round of summer parishes, but sometimes between Sundays I can be found upon my own acres (financially spelled "achers"), at Peterborough, N. H., where I shall be glad to give food and drink to any wayfaring '99er, if any have strong enough lunged machines to achieve the top of the Hill Difficulty upon which my hospice is placed. Later he writes "After pleasant ministries in Walpole, N. H., and Greenfield, Mass., I have been translated to the pulpit of the Second Church in Boston. Being a parson has been so congenial a labor, that, I have jog-trotted along without a single climatic up or down, so that my only report must be the dull, but comfortable one of progress." I have written 400 sole-stirring sermons, and 100 scattered addresses. Member: Harvard Club of Boston, Peterborough Golf Club, and Masonic and other bodies.

In March, 1911, I gave up my position in the Merrill Trust Company at Bangor—the confinement of that indoor occupation having been rather irksome to me—and went to Ellsworth, Maine, to try the outdoor life of farming. There I resided until September, 1912, at which time, having decided that I did not care to follow farming as a life pursuit, I moved my family to Boston. That city is still my home. There is little else of significance for me to report. In August-October, 1913, in company with William C. Codman, Jr., of Beaufort, S. C., I took a trip to Glacier National Park, Montana, “the coast,” and into northern Alberta to a point beyond the North Saskatchewan and Beaver Rivers (between 54 degrees and 55 degrees north latitude). Duck-shooting was the sport enjoyed in northern Canada. At the present time, I am not engaged in any occupation. Member: National Geographic Society, of Washington, D. C.

In the spring of 1911 I decided to devote myself to musical work exclusively, forsaking less congenial, though more

remunerative, pursuits, and in June of that year went abroad for study of organ-playing, boy-choir training and related branches with T. Tertius Noble, then at York Minster, England. While abroad, I visited France, Germany and Switzerland, and also found time to see something of England, but have so far refrained from writing a book about my foreign experiences. Since returning to this country [which in spite of much pleasure and profit (professional, not financial, far from it) derived on the other side, I was very glad to do], I have been organist and choirmaster of St. John's P. E. Church, Georgetown, Washington, D. C. I am still unmarried (otherwise I should have to confess to other sources of income), and prospects for the future in this particular respect don't look a bit bright, either.

During the five years, since the decennial report, I have become more and more identified with civic, social and industrial movements. After having spent two years in a typical community church in Waterbury, Conn., two years in an aristocratic parish in New York, and two years in a church in the slums, I withdrew from active parish work in 1911, and organized the International Civic Bureau, to act as a medium of exchange for information between America and foreign countries relating to the practical things which show how other countries deal with their civic, social and industrial problems. During 1912-1913, the activities of the Bureau resulted in a series of investigations in Europe

by persons from various parts of the United States and Canada. During the summer of 1913, a civic and social tour was conducted in co-operation with New York University, where the study programme of the tour was made a regular part of the University curriculum. As a result of this 1913 trip, the work of the Bureau has been reorganized, and its scope enlarged with special reference to a plan of co-operation with the principal universities of America. Henceforth the work will be carried on under the name of Institute of Educational Travel, an incorporated body, of which I am one of the founders and hold the offices of secretary and treasurer.

On October 1, 1910, I went into partnership with Arthur N. Leeds, of Philadelphia, in the Wabash Mills Company, for the manufacture of wool spun cotton carpet yarns, from which we make a poor but honest living. We fondly hope some day to be investigated by the Federal Government as the only manufacturing concern in Philadelphia that is making any money. All of our spare time is occupied in frantic efforts to keep ahead of our fast growing family. We consider it of the utmost importance to play tennis better than our children; baseball better; tango better; to be able to locate, bound and name the capitals of the central states; do compound fractions; know the school and college scores and records; to read Bernard Shaw, Bergsen's Philosophy, and Robert W. Chambers; in fact to do everything that everybody else does, except to own an automobile. We are not yet charging off depreciation on one of those. Member: Philadelphia Harvard Club, Racquet Club of Philadelphia, City Club of Philadelphia, Germantown Cricket Club, American Academy of Political and Social Science, Philadelphia Geographical Society.

Five years ago, my classmates, I left you at the "Vic" in the good hands of "Jim" and "Joe" and "Billy." But in the fall of 1910, I resigned from that delightful resort in order to get married. And this has proven to be the best thing that has befallen me since my choice of Harvard as Alma Mater. (I recommend all you belated ones to go and do likewise). We have one youngster, now almost a year old, who, I am glad to say, bids fair to resemble her mother. Since our marriage, we have lived not only in Boston, Brookline, and now in Waban, Mass., but also in that most delightful of all places in California, the Montecito Valley, near Santa Barbara. Meanwhile I have maintained an office at 2A Park St., Boston, in association with Mr. Stephen Child (M. I.T. '88), and enjoy a slowly increasing practice in landscape architecture. Among other societies of lesser importance, I am a member of the Harvard Club of Boston, Fellow of the American and Boston Societies of Landscape Architects, and the Waban Improvement Society., and have written a few articles on landscape architecture for the gardening magazines.

I am still connected with the real estate office of Henry W. Savage, although it is now known as Henry W. Savage, Incorporated. We moved about three years ago from 7 Pemberton Square, to 129 Tremont St. On January 1, 1914, Mr. Savage withdrew, and the business was taken over by Frank H. Purington (also a '99 man), who had been managing it for several years. The department in this office of which I have had charge for some years, is that of management of real estate, including collection of rents, repairs and general supervision of property acting as agent for many different owners of Boston real estate. Since our decennial year, I have lived quietly, and have neither particularly disgraced myself nor distinguished myself during that time, which answers your inquiry in volume two, of '99 *Returns* which I have just received.

Our report on the occasion of “ ‘99’s ” decennial found me in Woonsocket, R. I., but my then bosses, Stone and Webster, commuted my sentence for good behavior and sent me in December, 1909 to Haverhill, Mass., as manager of the Haverhill Gas Light Company, which they had just acquired. There a broken down plant was brought up to date, and an operating and business-getting organization built up. While in Haverhill, I was a member of the usual clubs: Pentucket, Wachusett, Merrimac Valley Country Club and Fort Nightly Club. In May, 1910, I made a brief visit to England, returning to my business in Haverhill. On August 27, 1912, I was married at the Rectory of Our Lady of the Mountains, North Conway, N. H. to Marie Phyllis Phillips, daughter of Charles and Grace Sherwood Phillips of New York. Our motor trip of two months took us through the White Mountains, Vermont, Lake George, down the Hudson to New York, through New Jersey and eastern Pennsylvania. On January 1, 1913, I entered the employ of the General Electric Company, spent a couple of months at their factories at Schenectady, N. Y., and Pittsfield and Lynn, Mass., and was then sent by them to the Pacific Coast. I am now attached to their Seattle, Washington, office in which city I make my home. All good ‘99ers will, of course, come to San Francisco in 1915, and it is equally certain that *en route* or returning they will find it impossible to resist a visit to the metropolis of the Northwest, the Gate to the New Alaska, a city doubling in size and wealth while your back is turned, a city nestling on Lake Washington, encircled by the snow-capped Cascades and Olympics, the Guardian of Puget Sound, King of the Fisheries and rich forests of the Northwest.

I have worked on the news and editorial staff of the Register and Leader, Des Moines, Iowa, the Butte (Mont.) Miner and the Anaconda (Mont.) Standard. For a few months in 1904 I did editorial work on the magazine of the Wayside Publishing Company, in Chicago, but the publication found too many obstacles in the western field, and the company found receivership proceedings fatal. country, and these plantations produce annually approximately 475,000 short tons. S. Company, and via the Tehuantepec National Railway Company of Mexico. I am treasurer of the University Club of Hawaii and vice-president of the Outrigger Canoe Club of Hawaii. It is interesting to note in the University Club year-book of July 1, 1913, that Harvard heads the list of universities and colleges as to number of men belonging to the club—37. I am still in the bond business with Lee, Higginson and Company, being manager of the bond department of the Boston office. This brings me in touch with numerous '99 men, both here and elsewhere, a very congenial part of the job. The last few summers I have spent at the Third Cliff, Scituate, in the same settlement with Bill Coffin, and near enough to Dreamwold, to see more or less of Eben Stanwood, as we commute to and from Boston, and to get an occasional glimpse of our genial secretary at North Scituate. I am still living in Winchester, where I take an ac-

tive interest in town affairs, not as a candidate for office, but as one of a comparatively small number willing to work to "get out the vote." The large number of indifferent voters is surprising, yet probably no more so in our town than elsewhere. I am secretary and director of the Winchester Country Club, and a member of the Board of Cemetery Commissioners of the town. Member: Harvard Club of Boston, Winchester Country Club.

Address	<i>(business) U. S. Immigration Station, Boston, Mass.</i>

During the last five years the only thing of interest that I think of, was being detailed to examine and render such assistance as may have been needed in several serious marine accidents. I was detailed to board the "Baltic" after the sinking of the "Republic." The next was to board the helpless "Florida" that had been in collision with the "Republic." About the most exciting, however, was the detail to the "Carpathia" to give aid to the survivors of the "Titanic." Otherwise I continued on duty at Ellis Island examining candidates for admission to the United States. During the year 1911 was appointed assistant at the New York Post Graduate Medical School and Hospital in the department of skin diseases. On January 2, 1913, I was transferred from Ellis Island, N. Y., to the port of Boston, Mass., for duty with the Immigration Service. In April, 1913, I was appointed medical examiner for the Isthmian Canal Commission for the New England district. I have written: **Report of Mental Examination of Immigrants, Boston, Mass., also Medical Inspection of Immigrants.**

During 1909, and a portion of 1910, I was employed by the American Telephone and Telegraph Company, of New York, under the official title of Special Statistician. I soon discovered that I must either give up trying to pronounce my title or forego all social intercourse. Receiving a present of a case of choice Scotch about this time, I gave up my title and went to Indiana, where I endeavored to make a living as a farmer. I continued my efforts until 1911, when the local banks showed such a lack of enthusiasm about my abilities as a farmer, that I returned to Boston, and joined what our friends fondly call the "Standard Tire and Robber Company." At this safe distance, the comments of the aforesaid bankers being somewhat tempered, by the United States Postal Regulations, I have continued my farming operations from Boston. I am spending my declining years in the philanthropic pursuits of compiling statistics on the mortality of automobile tires in Boston and raising cantaloupes in Indiana. (The latter I sell under the name of and at no higher prices than Rocky Fords). I was married in 1910, and the neighborhood in which I live at Arlington, Mass., contains a large number of children. [His letterhead gives the name of his company as "Standard Tire and Rubber Company," and his title as "Manager Mail Order Department." See.]

CLASS OF 1899 — FOURTH REPORT

Years in College 1895-1899.

Degrees A.B., 1899; B.S., (*Mass. Inst. Tech.*) 1901; M.S., (*Mass. Inst. Tech.*) 1901.

Married Eleanor Howard Dean, Weston, Mass., June 1, 1910.

Address (*home*) 5435 East End Boulevard, Chicago, Ill.

(*business*) 900 So. Michigan Ave., Chicago, Ill.

Since the decennial report was issued, I have been continuously with The Sanitary District of Chicago, and am now division engineer in charge of sewage disposal investigations, sewer construction, and all sanitary matters. At present I have under my direction contracts covering over half a million dollars. A goodly portion of my time is spent in expert work on lawsuits. In addition to my work with the district, I have acted as consulting engineer to various towns, including LaGrange, Wheaton, Riverside, Glen Ellyn and Evanston, Ill.; Madison, Wis.; Mason City, Iowa; Kenmore, Ohio; and others; and at present I am engineer jointly with George W. Fuller for a twelve million gallon rapid filter plant at Evanston, Ill. Last spring I gave a course of lectures on the purification of water and sewage at the University of Chicago, and at the Medical School of the University of Illinois. At other times, I have lectured on sanitary topics to clubs or local organizations. I am now a member of the American Society of Civil Engineers, the Boston Society of Civil Engineers, the Western Society of Civil Engineers, the New England, the Illinois and the American Water Works Associations, the American Public Health Association, American Chemical Society, and other organizations of like character. I am a member of the Council of the Association of Harvard Engineers, and a member of committees in various engineering societies. On the social side I belong to the University Club of Chicago, the Harvard Club of New York City, and the City Club of Chicago, and two alumni associations. I have written various published articles and reports, of which the following are the more important: The Sewage Testing Station of the Sanitary District, *Engineering News*, March 31, 1910; Relation of

RECORDS OF THE CLASS

Water Supply and Sewage Disposal, Proceedings Illinois Water Supply Association, 1910; Lake Michigan Water Commission, Second Report, 1911; Articles on Sewage Disposal, The Sewage Testing Station of the Sanitary District and a Sanitary Survey of Lake Michigan; Sewage Disposal in the United States and abroad, Journal Western Society of Engineers, September, 1911; The Sludge Problem, American Public Health Association, 1912; Report on Improvement of Water Supply of Evanston. Ill., 1912; The Design of Small Sewage Pumping Stations (with S. A. Greeley, '03), Illinois Society Engineers and Surveyors, 1914. Confidentially I want to say that I was indeed surprised to find I had the longest history in the decennial report. Evidently '99 is given to doing rather than writing, a wholesome sign, or was it the editor? Where were the literary men? I trust this time I am not the offender.

I am engaged in the same line of work, accounting, as at five years ago. The, to me, most important events since June, 1909, have been the coming to us of two daughters. These, added to a lively boy, whose existence was duly announced in the 1909 report, have not allowed time for me to seek, and hold any office of honor and trust except that of "father" and thus far none other has sought me. Children	<i>John Charles, Jr., Dec. 24, 1908; Madelyn, Aug. 16, 1912.</i>
Business	<i>Naturalist.</i>
Address	<i>Wenham, Mass.</i>

Since 1909 I have lived mostly at Wenham, spending both summers and winters there. The time has been broken by various short trips, the longest to the Sudan in the winter of 1912-13. Zoological material obtained on these trips has been turned in to the Harvard Museum. Other trips of like nature are being planned but not often carried out. Hobbies and work (mostly hobbies) have gone hand in hand and a good deal of time has been spent in the experimental study of heredity, working with birds here and mammals at the Bussey Institution, also in "messing" over collections of birds in Cambridge and with aviculture on the farm at Wenham. A few papers have been written from time to time, mostly scientific abortions, or at any rate nothing of general interest. The authorities have seen fit to give me a key to the Zoological Museum at Cambridge, and to put my name on an obscure door. I have forgotten all about medicine and have to send for a doctor every time I sneeze. We have a pair of offspring, male and female, and this brings me to another topic. By way of being cheerful, it is my belief that unless some of the influential members of the class of '99 get busy and help to restrict the immigration of undesirable aliens into this country, the class babies, now developing, will find "this here corner" a mighty poor place to live in. I have written miscellaneous papers and notes in *Journal Ex. Zoology*, *American Naturalist*, the *Auk*, *Bulletin of Museum of Comparative Zoölogy*, *Biological Society of Washington*, *Science*, and with Professor W. E. Castle in *Carnegie Institute Publication*. Member: St. Botolph, Colonial, Boone and Crockett Clubs.

I have nothing to add to my story as written for the decennial, except that I have moved a little closer to civilization now being located at Haverford Station on the Pennsylvania Railroad, nine miles from Philadelphia. My avocations are chiefly soccer football, which I play every Saturday during the fall and early winter, and then a little squash and more

tennis in the summer. Evening amusement chiefly is keeping up with the new steps. I am still happy and contented. I almost forgot to say that I am treasurer of the county council Boy Scouts of America. It is a great movement. With the aim of making myself a music critic, and with the hope of having my criticisms of weight in the most musical city in the world, I began a practical course in printing and bookmaking with the Norwood Press, where I shook from myself the dust of pedagogics (I had been a teacher), and got some printers' ink on my hands. For actual experience in literary fields, I assisted in the preparation of the manuscripts of Ralph Waldo Emerson for additional volumes recently printed by the Houghton Mifflin Company. Thence I entered the Oliver Ditson Company, music publishers of Boston, as an assistant to the editor of "The Musician." From there I was called to New York to assume the responsibility for the publications of the music-publishing house of G. Schirmer—the "Bulletin of New Music" and "G. Schirmer's Musical Digest." For the "Bulletin" I write the critical analysis of all G. Schirmer publications and I review current musical events, including operas, concerts, and whatever else of musical interest takes place during the short but very busy New York season. The "Digest" covers the field of musical pedagogics, dealing with problems of interest to the teacher and student of music, and containing articles specially written by recognized authorities. The preparation of these two periodicals proves very interesting to me and is quite in accord with my tastes and training. Coming as a stranger to this great city, I naturally sought the Harvard Club of New York City, of which I became a member. But after attending the various functions of the club for a year, I found them rather too formal and stiff for my temperament; and so I resigned in favor of a club (German), where I soon came to know men congenial to my tastes. On the whole, my life has been a serene and happy one during the years I have been here. Recently, however, I have been the victim of some of the New York robbers, whose name is legion; and they succeeded in breaking up my home, taking with them almost everything of value. I am now to be counted among those who are interested in the investigation of local police conditions,

RECORDS OF THE CLASS

and in the reorganization of the department of police. Soon after coming to New York, I met my fate (matrimonially speaking). In other words, I married on February 21, 1912, in St. Paul's Chapel, Columbia University, Alice Madeleine Smart, a New York girl who fully measures up to Harvard standards, though herself a graduate of Columbia. Member: New York Booksellers' League, New York Arion Society.

I have little to add to the story of the decennial year. I still am a graduate of the Class of '99, preaching in Belmont, Mass. I am now president of the William Reed and Sons Company, which publishes the Taunton Daily Gazette; but the report of my professional life is simply this, I am preaching (a different sermon almost every Sunday), in the same town, and the same church. In June, I shall round out my twelfth year of ministry in Belmont. I am a trustee of the Belmont Public Library; that is my only office of peculiar distinction, as I am still subject to the proposed tax on bachelors.

ROBERT IRWIN REES

Born	<i>Houghton, Mich., Nov. 9, 1871.</i>
Parents	<i>Seth Rees, Eugenie Melinda Livermore.</i>
School	<i>Michigan College of Mines, Houghton, Mich.</i>
Years in College	<i>1895-1896.</i>

Business	<i>Captain, 3d U. S. Infantry.</i>
Address	<i>Fort Leavenworth, Kan.</i>

After leaving Harvard in 1896, I attended the New York Law School during the following year. By a queer twist of fate, however, instead of following up the law, my then chosen profession, I found myself in the army. During the Spanish-American war I was on submarine mining duty in New York Harbor. I saw much active service during the Philippine insurrection from 1899 to 1902. After a tour of home service at eastern stations, I again, in 1904, left with my regiment the narrow confines of the United States, and spent two pleasant years on the Yukon in latitude sixty-five, cutting new trails, constructing telegraph lines, and doing our little mite toward the opening up of our great north-western territory. The year 1909 found me again in the Philippines, this time in Moroland on the little island of Jolo. The Moros, a hard fighting lot, had been at peace for several years, but a disarmament order caused them to break out afresh, and in 1911-12 we had much weary marching and many brisk skirmishes before they were once more subdued; indeed, when in 1912, I was ordered home, the end was not yet. Army life, as you see, is one of violent changes, but very attractive withal. We never finish school in the army; I am even now a college student. Last year I graduated from the Army School of the Line, and I am now in the Staff College here at Leavenworth. By the way, the most interesting course we have this year is one in Historical Research, conducted by Captain Arthur L. Conger, Harvard '95. It is a course which I think would please even Professor Channing. Member: United States Infantry Association. Military Service Institution.

Brown Brothers and Company, bankers, 59 Wall St., with whom I have since been engaged. During this time I have served as messenger, bookkeeper, accountant, bond clerk, head of the department for purchase and sale of securities, and bond man, which position I now hold. Address	<i>(home) 22 West Cedar St., Boston, Mass. (business) 60 Federal St., Boston, Mass.</i>

Continuing my life from the decennial, I was re-elected to the Legislature in the fall of 1909, but in 1910, the voters decided that I could be of greater benefit to them, by staying at home and practising law. To show them their mis-

take, I quit the practice of the law, and went into cotton manufacturing with the Farwell Bleachery and Farwell Mill, with my brother-in-law, N. F. Ayer, 1900. My principal occupation was running the bleachery, which is situated at Lawrence, Mass. To make up for the time spent in Lawrence, which was half the week, I had to spend the rest of my time in New York. I was married in the spring of 1910, while I was still in the Legislature. In July, 1913, I became assistant treasurer of International Cotton Mills, a re-organization under the Massachusetts laws of a company manufacturing a large portion of the cotton duck made in the United States, and in January, 1914, I became the treasurer. While the main business of the corporation is cotton manufacturing, its legal complications are so many that I have the almost daily pleasure of meeting Mr. J. W. Farley '99, as the legal adviser of the company, who has so far guided us with great success. Member: Boston City Club, Exchange Club, Tennis and Racquet Club.

Since the decennial report, I have been busy at my profession, the law, at Butte, Montana, and at Redlands and San Francisco, Cal. I have, however, since December, 1911, been busier as the executor of a considerable estate, in which ca-

capacity, I have been, and still am, permitted to serve without bonds! And yet, I haven't been chased and captured by that Grecian person who has been so long hunting for an honest man. Other than the foregoing, my interests have been strongly domestic. My wife and I are doing our best to keep in good health, and proper spirits, our three daughters, to the end that they be fit candidates, not for office, but for degrees from some institution worthy in due time to receive them. I am still sound in wind and limb; and so are all of my family. As to political or financial soundness, I decline to answer.

When the Madero revolution became serious in the winter of 1911, I was sent as a correspondent for Collier's to the border, and later to Mexico. The sudden mobilization of our troops brought me back from Mexico City to San Antonio, where I spent a very interesting and instructive week or two, in and about the American camp. In the autumn of the same year, I again went to Mexico, landing at Vera Cruz and traveling for several days with the Madero party, while Mr. Madero was finishing the campaign which preceded his election. After the election, I went down into southwest Mexico and climbed the volcano of Colima, unsuccessfully attempted on my previous visit. In the spring of 1912 I made the long journey to Bogota, the capital of Columbia, and in the summer of 1913 traveled through the Central

American republics. As a result of these trips I have contributed articles to various magazines and I hope some day to put these, with other matter, into a book about the Caribbean neighborhood similar in point of view to my other book about South America. I left the staff of Collier's at the close of the year 1912, continuing, however, as an occasional contributor, and since the beginning of the present theatrical season have been dramatic editor of the New York Tribune. I have written one book since the last report—"Second Nights" (People and Ideas of the Theatre Today).

Since the last report I have continued in the employ of the city of New York as a civil engineer, on the development of the new water supply from the Catskill Mountains. My work has been in connection with the building of the great aqueduct which will carry water one hundred miles to the city, in quantity sufficient for the supply of five million people. I have been on this job for eight years, and started on some of the first surveying work to determine the route through the country. The experience in the development of this project has been interesting and varied, as the problems met are unusual. My work has consisted of geological surveys, interpretation of underground investigations by borings for determining the character of the rock, location of tunnels, and active participation in the construction of aqueduct built in cut-and-cover, grade tunnels, steel pipe lines, and deep pressure tunnels blasted through rock, which cross below the floors of valleys, under rivers and streams. A large engineering organization had to be built up especially for this project. A number of Harvard men have been prominent in the organization and have done fine work for the city of New York. The first few years were mainly devoted to investigations for determining the location and amount of available supplies of water, surveys for deciding on the best location of the works, and when the location was determined, studies and designs for the structures, followed by actual location on the ground. Contracts for the construction were next let, and the engineer corps was largely increased, to handle the supervision and inspection of the contractors' work. Large camps to house the workmen had to be built, often at some distance from the railroads, and sanitary oversight of these camps was maintained by the city's engineers. The work has brought me in personal touch with a great many men, foreign and colored laborers, miners and mechanics, as well as the American workmen, superintendents and contractors who wander around the country following construction jobs. Since 1905 I have been living "up the state," stationed at a number of places where the work was in prog-

ress, along some 65 miles of the aqueduct line. This work is now practically completed, and the men employed on the work have nearly all left the country for other jobs. At present I am living in New York City, where I am in charge, as division engineer, of about nine miles of the deep tunnel from the Yonkers city line to Central Park. It is expected that this work will be completed in about one year more, when the Catskill water will become available for use in New York and Brooklyn. Member: The American Institute of Mining Engineers, and associate member of the American Society of Civil Engineers.

In 1910 I was transferred from the treasurer's office of the Provident Life and Trust Company to organize the purchasing department of the company, in charge of all purchases (excepting investments), including repairs and alterations to real estate. I am still purchasing agent, a position encumbered with much detail, largely petty. My interests outside of business have increased and become more arduous. I have

become a member of the committee in charge of Westtown School, a boarding school near Philadelphia, managed by and for members of the Society of Friends, a member of the Philadelphia Friends' Educational Committee, and treasurer of the Friends' Asylum for the Insane. Whatever time I have left at home after reading "The Harvard Bulletin," I endeavor to devote to the proper training of my five children, which, needless to say, gives me more pleasure than anything else I do. I am still fond of cricket, but "soccer" football proves a little too strenuous when played only once a week, without any practice or training. I do a bit of canoeing and a year ago had a splendid three days' trip through the rapids of the upper Delaware, from Hancock to Port Jervis, said to be the finest swift water canoeing in the East, barring the Susquehanna. In 1909 I bought two acres on the outskirts of Germantown in the midst of a beautiful wooded old family estate and built a house, where I expect to spend the rest of my life.

Since my last report, my life has been very uneventful. I am still with the American Radiator Company, where for the last two years, I have been the manager of their Chicago branch, which covers the states of Iowa, Illinois and Michigan. I travel considerably over these states, occasionally visiting our many classmates in St. Louis, and to vary the crudity of western life, I manage to reach New York and the effete East, about twice a year. My only bid for fame, since I welcomed Roosevelt, on his return from Africa, together with many others of his Rough Riders, is that I have a wider acquaintance amongst the plumbers of the United States, than any man in the famous class of '99. I am an architect and structural engineer and since 1908 have been in partnership at Philadelphia with Albert Dodge, Harvard '02. I have done no literary work except to write specifications but I feel assured that the latter have been read with a sincerer interest by the mechanic class than most novels would have been. I am, however, a director in the Cardington and Collingdale Land Company and also in the Cardington Land Company, and am a member of Wolfenden, Shore and Company, woolen manufacturers. I am active in the pursuit of my profession and have designed or participated in the de-

J.; a large structural steel store and factory building at Philadelphia, and a number of large country houses in the Philadelphia suburbs. Business	<i>Civil and Construction Engineer.</i>
Address	<i>157 Percival Ave., Montreal West, Quebec.</i>

In 1911. and at the completion of the Pennsylvania Terminal work in New York City, I went to Montreal, Canada, and became resident engineer on the construction of the new \$1,000,000 bridge shop of the St. Lawrence Bridge Company, Limited, an entirely new plant for the construction of the new Quebec bridge, now being fabricated. At the completion of this plant in December, 1912, I spent the year 1913, with C. E. Deakin, contractor and builder, and with the building department of the Canadian Pacific Railway, in general estimating and a variety of building work. Since October, 1913, I have been resident engineer on the construction of the new \$3,000,000 gas plant at Ville La Salle, Lachine, P. Q., Canada, for the Montreal Light, Heat and Power Company. While I much prefer my native country, I have enjoyed the lure of outside construction work, and my living in pioneer Canada to such an extent that I have now a home here. I miss the benefits of close proximity to my alma mater which I enjoyed in former

years, after graduation. Close application to professional work and attention to a young family, have precluded all desires which I have had for membership in clubs or extended travel. As for sports and leisure, Canadian winter sports are a great attraction here. In summer lawn tennis, garden, flowers and a small variety of building operations about my own place add much interest to my little leisure time.

In May, 1909, I was invited to return to my former pastorate in Peru, Mass. I accepted the invitation and began my service with the Peru Congregational Church the first of June, 1909. In July, 1911, I was requested also to serve the Methodist Episcopal Church in West Worthington, Mass., which is in a village three miles east of the Peru Church. I accepted the invitation from West Worthington, and now am serving both churches as their pastor. Nothing of importance has taken place since I came here to serve, except possibly, after the main tower of our church in Peru was blown off in December, 1911, I was able to secure about

\$600 from people out of Peru, to help make repairs on the church and to repaint it. For the last four summers The Massachusetts Home Missionary Society has used me in caring for the large tent at Northfield, Mass., during the general conference held each year the first three weeks of August. The tent accommodates the Home Missionary pastors free of charge. Member: Berkshire North Ministerial Union.

Since 1909, my work has been very much the same as described in the earlier part of the class history. I have specialized in the study of the operation and traffic of American railroads, and for two years published a monthly magazine called "Railroad Studies." This dealt with about fifty different railway systems in this country and was the result of personal investigation of many of them out on the line. I think, perhaps, I may claim title to the class record for travel for, in the fifteen years since leaving college, I have covered approximately 350,000 miles. I expect soon to go abroad, and while there, I shall make a study of the government-owned railroads. I am a member of the Middlebrook Country Club, and my chiefest pleasure in life is playing golf.

During the five years since the last report I have continued as pastor of the Middle Street Baptist Church, Portsmouth, N. H. The work has kept me reasonably busy, and afforded much of pleasure and profit. The old town by the sea with its traditions from the past, and its present enlivened by frequent visits from ships of the navy, and a stream of summer residents and tourists in the summer, has many attractions. I have no doubt that many classmates have whizzed by my front door on their way to The Rockingham or The Wentworth. I can think of nothing to place alongside the great accomplishments of my classmates which will be recorded in the forthcoming report. The things that amount to the most we none of us naturally make record of there. It occurs to me that possibly I may have had the good fortune to marry as many couples as any member of the class, having to date joined 133 couples in marriage, most distinguished among them our classmate E. B. Wilson and wife. Other classmates will be welcome. When your auto glides through the old streets of the town and stops before The Rockingham, remember that a classmate lives just around the

corner, at your service, even though you happen to be happily married already. But if you think to atone for failure of the first marriage by attempting a second don't come to him. Vacations I have spent on Georgian Bay, Ontario, or at New Castle, N. H. I have written no books, joined no clubs of consequence, held no important offices, nevertheless have been happy.

The Wire-Bound Packing Case Company limped along for three years, and then owing to a complication of factory troubles, low prices, litigation, etc., we wound up the business and took a loss. I then associated with George A. Cole, '99, in real estate and insurance at 50 Congress St., and am still at it. I have done no traveling, and have simply spent my winters in Boston, and summers in Egypt, Mass., where I am interested in several shore properties. I regret that I did not answer for the decennial report but my history has been uneventful. After graduating from the Harvard Law School I returned to Cincinnati and went to work with my father's law firm, at that time Stephens and Lincoln. I have been a partner with my father and Mr. Lincoln for the last seven or eight years and have worked exclusively at the law, varied only by occasional vacations in the Canadian woods and in Europe. I am not married and am still living under the paternal roof. Member: University Club of Cincinnati, vice-president of the Cincinnati Harvard Club.

FRANCIS RUSSELL STODDARD, JR.

Born	<i>Boston, Mass., July 26, 1877.</i>
Parents	<i>Francis Russell Stoddard, Mary Frances Baldwin.</i>
School	<i>Hopkinson's School, Boston, Mass.</i>
Years in College	<i>1895-1899.</i>
Degrees	<i>A.B., 1899.</i>
Married	<i>Eleanor Sherburne Whipple, New York, N. Y., Nov. 8, 1909.</i>
Children	<i>Margery Pepperrell, Dec. 29, 1910; Howland Bradford, May 22, 1912; Anna Bailey, March 20, 1914.</i>
Business	<i>Lawyer.</i>
Address	<i>(home) 102 Waverly Place, New York, N. Y. (business) 43 Exchange Place, New York, N. Y.</i>

When I wrote my last account, I was employed in the law department of the Brooklyn Rapid Transit Company, in the trial of jury cases in Supreme Court and in the arguing of appeals in the Appellate Division. I also supervised the Municipal Court and Criminal Court departments of the company. In December, 1909, I resigned to become connected with the firm of Greene, Hurd and Stowell at 43 Exchange Place, New York City, where I have since been engaged in the general practice of the law. I have been very active in politics. Each fall since 1907, I have been elected at the Republican primaries to the New York Republican County Committee, and have also been a member of the Republican City Committee. In 1909, I succeeded the Honorable William H. Wadhams, Judge of General Sessions, as president of the Madison Square Republican Club, the regular organization club of the 25th Assembly District, and I was re-elected to this position in

1910, 1911 and 1913. In 1914, I was succeeded by Robert McC. Marsh, '99. During part of 1910, I served as a special Deputy Attorney General of the state. In the fall of 1911, I was elected by nearly 2,000 majority to represent the 25th Assembly District of New York County in the State Assembly at Albany and I served during the session of 1912. In the fall of 1912, I was renominated but, because of the split in the Republican party, every New York City candidate for either house of the State Legislature was defeated at the election. My vote was proportionately the largest cast for any Republican candidate for the Assembly in New York County. In the fall of 1913, I was renominated by the Republican party, and Tammany, National Progressive, and other candidates against me. I received several hundred more votes than all my opponents combined. I am at present representing my district at Albany. According to the last census, the district has a population of about 60,000. After resigning as captain from the 14th Regiment, N. G., N. Y., in 1906, I did not serve in the active militia until the fall of 1912, when I enrolled in the Veteran Corps of Artillery, a light battery and the oldest military organization in the state. Some years ago, I served as senior vice-commander of A. L. Kline Camp, United Spanish War Veterans, and in 1912, I was appointed legislative aide to the Commander-in-Chief. I have written: "The Stoddard Family", a genealogy published in 1912; articles on old houses at Plymouth, Mass., published at different times in the Massachusetts Magazine. I continued practising law at 60 State St., Boston, until the fall of 1911. I entered the employ of the Boston Book Company at that time as traveling salesman in the legal department of that company, whose business consists primarily in dealing with libraries, and has customers throughout the country. As their representative, I saw quite a bit of the

eastern part of the country traveling from Skowhegan, Maine, to Athens, Georgia. Having visited a large number of colleges in the territory covered, I will not give my impression of which are the saddest appearing, as comparisons are odious, but will say that I was particularly impressed with the distinctive attractiveness of the layout and buildings of the University of Virginia at Charlottesville. As a result of my business trips, I am also impressed with the prolificness of Mr. Carnegie's Library Fund. Leaving the Boston Book Company last spring, I was with the Taylor Machinery Company of Boston, dealers in machine tools, for some time, and last December assumed my present position with the Turners Falls Company at Turners Falls, Mass., where I am in the Hydraulic Engineer's office looking out for the ordering of supplies, the preparation of estimates and trying to make myself generally useful in matters where a scientific training is not essential. I am also acting as purchasing agent at Turners Falls for the operating end of the company. On May 25, 1912, I married Ruth Maynard Soule of Brookline, Mass., daughter of Charles C. Soule '62, and thereby became a so-called brother-in-law of our classmate, William B. Coffin. I live at Turners Falls, and by the time the report is published hope to have my family well settled here. Member: Longwood Cricket Club, Longwood Covered Courts and Harvard Club of Boston.

I summed up my decade after June, 1909, for the decennial report in three and one-half lines. Only five years have since passed, but I find myself threatened with something that approaches the garrulity of old age! The reason, however, is not graying hairs nor great accomplishments, but rather the result of the pleasure and interest I found in reading other fellows' experiences in that same decennial report, whether I knew the men or not. I have said to myself, why not shed a little more light on my own existence, humdrum as it may seem? Since leaving my position in the Harvard College library, I have spent the past ten years in, but hardly of, New York City, as librarian of an Episcopal Theological Seminary. I have lived and worked in a little corner of the city which is

hidden away from its bustle, made beautiful with green grass and trees and surrounded by an Oxford-like quadrangle of buildings. In short, I work at one end of a long city block, and live near the other end in what is really very much of a college dormitory. By my door at night there often pass footsteps of late home-comers, but they never lag with the tell-tale hesitancy I have known in years gone by! My dog, which is my whole family, and a satisfying family at that, does not even growl. Beneath my windows are two splendid tennis courts which help the summers pass. Despite the specialty of this library in theology, it is, to my joy, fairly rich in the sort of books which I most care for, early printed volumes, old bindings, books with early wood-cuts, early manuscripts, etc. Moreover we purchase fairly largely in general history, sociology, and biography. Contrasted with some occupations, mine may seem uninteresting and cloistered, but it has its compensations, and after all Times Square is only fifteen minutes away. On the faculty and among the students, are always a number of Harvard men; this coupled with membership in the Harvard Club, keeps me well in touch with Harvard interests, tho' I see very few '99 men, except Harry Thompson, Adelbert Smith and George Vedder. At various times I have been president and treasurer of the New York Library Club, and my membership in the Grolier Club of this city adds much to the pleasures of my chief interests and work. I have edited, with biographical sketch, "The Intellectual Torch," by Jesse Torrey; an early American plea for free public libraries, published in 1912. Member: Harvard Club and Grolier Club of New York City; New York Library Club, American Library Association, Church Historical Society, Masons.

During the 1908 session the Agnew bills to abolish betting at the race-tracks came before the New York legislature, and were finally passed at an extra session which lasted well into the summer. In the fall of 1908, as a delegate from my district, I attended the Republican convention at Saratoga, where I voted for the renomination of Governor Hughes. Towards the end of the 1909 session, I introduced the New York County Republican election bills to prevent fraudulent voting. They included the much talked of signature law which provided for the comparison of the voters' signatures on election day, with their

signatures on registration day or, in the case of illiterates, the comparison of their answers to questions, as a means of identification. I was defeated in trying to pass these measures after strenuous fights both in the senate and assembly. From these fights I got a great deal of publicity; notices appearing in papers as far away as the Pacific coast. For the 1909 session, Speaker Wadsworth appointed me a member of the following assembly committees: Judiciary, Public Health, Revision. At the close of the session, I was appointed a member of the joint committee of senate and assembly to investigate, and determine whether the telegraph and telephone companies in the State of New York should come under the supervision of the Public Service Commission, and I traveled all over the state listening to public hearings. In the fall of 1909, I was unanimously renominated by the Republican convention of my district, and was again elected, having run on a fusion ticket and having received 5,536 votes against 3,260 votes cast for Chas. L. Kohler, the Democratic candidate. At the beginning of the session, Speaker Wadsworth appointed me a member of the following committees: Judiciary, Railroads, Revision. During the session of 1910, I re-introduced the election bills which were supported by Herbert Parsons and the Republicans of New York County. After strenuous fighting, these bills finally passed both houses of the legislature at an extra session, at which they were included in the governor's message convening the legislature. In the spring of this year I became a member of the law firm of Everett, Clarke, Benedict and Ward, 79 Wall St., New York City. During the three years I was on the Judiciary Committee, I had consistently voted against the different woman's suffrage resolutions before the committee. For that reason the Woman's Suffrage Party of New York City, decided to make an example of me at the election in the fall of 1910. In this campaign they invaded my district, held mass meetings in Union Square, where they denounced me, and made a house to house canvass of the voters of my district. Unanimously

renominated in the fall of 1910, I ran on the Republican ticket only, and in spite of the avalanche of a Democratic presidential election, and the opposition of my suffrage friends, I received 3,942 votes against 3,627 votes cast for David H. Knott, the Democratic nominee and was the only Republican elected in what was a strong Republican congressional and senatorial district. Speaker Frisbie for the session of 1911, appointed me a member of the following committees: Affairs of Cities, Revision. As senior member of the Republicans from New York County, I was the leader of those representatives in the assembly and had much fighting to do in opposition to the Democratic majority. During this session the protracted United States senatorship fight took place and James O'Gorman was elected after a deadlock lasting all summer. In the spring of 1911, I resigned from the firm of Everett, Clarke, Benedict and Ward, and later declined a renomination by the Republicans of my district. I then prepared to go to California on business, where I lived until the fall of 1912. While in San Francisco, I was active in the formation and incorporation of the Atlas Paving Brick Company, and was made its first secretary. In October of that year, I was called to Detroit, Mich., and resigning as secretary of the brick company, I became vice-president of the King Motor Car Company, and am now busily engaged in the manufacture of motor cars. Member: Sphinx Graduate Club of Harvard, The City Club, The Harvard Club, The Ardsley Club, Sons of the American Revolution and the Mayflower societies.

There is little to add to my statement in the decennial report. The past five years have added a few more gray hairs and have taken away some of my youthful spirits. Now behold me a staid practitioner, plying daily between home and office with the regularity, but not, thank goodness, with the load of a Fall River boat. My business has spread out a little so that I have interesting visits to other cities, particularly to Augusta, Georgia, which, as a great winter resort, offers many opportunities both for business and for pleasure. It is there that I learn most about golf, and after another ten winters or so I hope to be able to formally challenge the then surviving members of the class who are in the thrall of that alluring but tantalizing game. The only position of honor I hold is that of husband of the chairman of the Brookline Branch of the Massachusetts Association Opposed to the Further Extension of Suffrage for Women, a lady whom I daily more admire, a leader whom I shall ever enthusiastically follow.

The summer of my decennial I spent at Seabright, N. J., passing the fall in Briarcliff, N. Y. In December, I was blessed with a son Malcolm, Jr., but suffered the greatest of sorrows in the loss of my wife, Janet McCook Whitman. In order to recuperate, I went to Southern California, where I lived with my sister in the sunshine and out of doors for several months. I took several trips, one to Coronado, and one to Catalina Island, where I enjoyed myself fishing for monsters of the deep. I also visited the Grand Canyon, and other places of interest on my way across the country. On my return to New York, in the late summer of 1911, I toiled steadily in my business, passing my next winter in 115 East 60th St., with my two children. In the spring of 1912, I became engaged to Jennie Adeline Crocker, and the following summer, under the sunny skies of California we were married on July 16, 1912. We took a fishing and hunting trip shortly thereafter, going first to the McCloud River, near Mountain Shasta. Here we rode and hunted, and caught rainbow trout in that wonderful stream. We then took a trip to Catalina Island, where we spent our time fishing along the picturesque shore. Our next and great trip was to Klamath Lake in Oregon, where we fished for mighty rainbows, climbed mountains, and visited the miraculous Crater Lake region. We shot and camped and rejoiced. In the fall of 1912, we returned to Burlingame, our home in California, and then came East, where we have dwelt in happiness ever since, returning each year to California for a while. On September 21, 1913, we were blessed with a boy, Frederick Crocker Whitman. This summer we return to California for a spell, under sunny skies again, and so on. Years in College	<i>1895-1899.</i>

Business	<i>Librarian.</i>
Address	<i>(home) 167 Newbury St., Brockton, Mass.</i> <i>(business) Public Library, Brockton, Mass.</i>

Since the decennial, I have continued as librarian at the public library in Brockton. Life in a busy enterprising city has added zest to a work that in itself is always full of interest. The impetus now quite generally given to the various lines of municipal work has extended to libraries. This development has immensely enriched the public library field and makes it possible to help carry out some of the problems of the work in the terms of modern needs. All this simply to make it clear that the average conception of a librarian as a bookworm must be modified to the extent of dismissing the idea that his chief occupation is in browsing among books. Aside from my regular work, I suppose I have the usual number of connections with outside organizations and clubs. I have found special interest in a local economic club on the executive committee of which I have had the honor to serve. We have had many excellent discussions, and we have had the pleasure of welcoming many Harvard men as speakers. In the last two years, I have been associated, as president, with a library club which is pretty closely limited in its membership to Plymouth County, but which it is hoped is doing something to advance library interests hereabout. We have, in the city, a thriving university club, of recent creation, with a good representation of Harvard men in attendance at the meetings. We are just now giving a course of six free public lectures at the library and four Harvard men are among the speakers. Attendance at library conferences in various parts of the country and in Canada has given me some opportunity to

travel, and so to satisfy in part, a wanderlust that most of us at times experience, and which the many admirable books of travel now available will only partially allay. In the summer of 1909, I had a brief but wholly delightful trip to Europe, most of this time being spent in Holland with a chance to explore by canal and wheel some quaint sections of a picturesque country. During 1911, I had a short cruise through the West Indies, with time enough to see something of the canal region, and a part of the coast of Columbia. A propos of travel I should not omit to mention a journey to the region of Soldiers' Field in the fall of 1913. This, of course, needs no elaboration. Member: American Library Association, Massachusetts Library Club, New York State Library School Association, University Club, Brockton; Commercial Club, Brockton; Economic Club, Brockton; Old Bridgewater Historical Society, Old Colony Library Club, Thorney Lea Golf Club.

Address	<i>(home) 5 Park Vale, Brookline, Mass.</i> <i>(business) Institute of Technology, Boston, Mass.</i>

After the decennial I went to Europe where I spent most of my time in Vienna and Gratz. A side trip to Buda-Pesth was interesting but unpleasant because the Hungarians won't talk German and I can't talk Hungarian. During the second half-year (spring of 1911), I lectured at Harvard on Statistical Mechanics, a subject intelligible even less to my students than to myself. During this period the Institute of Technology saw fit to advance me to a full professorship of mathematics. July 5, 1911, saw me married by our classmate, Rev. Stanley, whom I can and hereby do recommend to my classmates, so many of whom are still in need of such services (Editor Adams may not let this by). Early in 1912 my *Advanced Calculus*, on which I had been working for five years, was published. It was a tough proposition to write, and I am told that it remains a tough proposition to study. Mrs. Wilson and I found a small abandoned farm on the side of Green Mountain, Effingham Falls, N. H., which we bought and where we may be found during the summers. An article on the Space-Time Manifold of Relativity, written in collaboration with my colleague, G. N. Lewis, appeared in the fall of 1912 and constituted my most important scientific contribution to date. Lucubrations of this sort may be expected from time to time, but they will not be inflicted on any class reunion. I have been elected to fellowship in the

American Academy. I have written: "Advanced Calculus," Ginn and Company, 1912. Member: American Association for Advancement of Science, American Economic Association for Advancement of Science, American Economic Association, American Year Book Corporation (New York), International Commission on the Unification of Vectorial Notation, Fellow of the American Academy of Arts and Sciences (Boston).

In July, 1902, I entered the law department of the Boston Elevated Railway Company, where I remained for four years, trying hundreds of tort and criminal cases. After my discharge as a private from the United States Volunteers at the close of the Spanish War, I served as private, corporal, second lieutenant, first lieutenant, captain and regimental adjutant of the First Regiment of Heavy Artillery, lieutenant colonel and inspector general, Massachusetts Volunteer Militia, and retired as colonel on September 1, 1910. I have served three years on the Milton Warrant Committee, the last as chairman; eight years on the Milton Republican Town Committee, the last five as treasurer; three years on the finance committee, three years as chairman of the election committee, and five years on the executive committee of the Republican Club of Massachusetts; two years on the executive committee of the Massachusetts League of Republican Clubs; several years as an election officer and many times as delegate to district and state Republican conventions. Died	<i>June 30, 1912.</i>

Louis Albert Best, was born in Valley Falls, Kan., December 26, 1876. Here his childhood days were passed until his father John Reuben Best, became manager of the Big Four Lumber Company, when he moved with his family to St. Louis, where he attended Smith Academy, until he entered Harvard University—taking the classical course, and graduating with the class of '99. After leaving college, he traveled extensively in order to acquire fluency in the languages. In 1904, he located in Kansas City, Mo., where in connection with his lumber interests, he took up architecture and building—and did some excellent work. After completing the apartment house at Armour and Broadway, his usual fine health gave way, and he suffered a nervous-breakdown. Everything was done to prolong a life of unusual promise. After a winter in the West Indies, his health had so far recovered, that his physician said he would be able to resume his business in the autumn. But on the 30th day of June, 1912, he was accidentally drowned while crossing one of the seven great lakes of Maine, in which he encountered a wind storm. His body was recovered, and buried at the old home in Kansas, where many friends came to do him honor. He was a man of unusual attainments, and high ideals—but humble and modest to a marked degree. He commanded the admiration, and love of all who came under the range of his influence. In his case it may be truthfully said “Death loves a shining mark,” and “the world is better for his having lived in it.”

Died *Nov. 14, 1910.*

Challis Bowker, only son of Frances Challis Bowker and grandson of Benjamin Challis, formerly Charlestown, N. H., died suddenly in a hospital at Baltimore, Md., November 14, 1910, and was buried at Pittsburg, Pa., November 19. He was a graduate of the Roxbury Latin School, and spent

two years after graduation at Harvard College, in the special study of political economy, intending to become a teacher of that subject. The greater part of these two years was passed in Harvard, with the exception of a few months at Oxford University. In the autumn of 1901, an excellent business opportunity was presented to him in the Pressed Steel Car Company of Pittsburg, which he accepted, and there rose rapidly to the position of superintendent. After a few years of remarkable success his advancement was interrupted by a serious illness and later by general business depression. He had, however, achieved so high a reputation in steel-car manufacture that at the time of his death he was general manager of the Standard Steel Car Company of Baltimore. Mr. Bowker was fortunate in winning the regard of thousands of workmen who came under his direction. He had many business associates and intimates in Baltimore and Pittsburg who valued him both as a rarely capable man of business and as comrade and friend. For, besides his strong, clear, and well-trained mind, he had a geniality and gift for friendship which made him welcome in every social group. His character was rich in honorable principles and loyal to Christian ideals. He has left behind him a notable record of useful and important service and a good name that will long endure in the hearts of his friends.

Robert Emmett Burke

Born	<i>Boston, Mass., March 28, 1874.</i>

School	<i>English High School, Boston, Mass.</i>
Years in College	<i>1896-1899.</i>
Degrees	<i>S.B., 1899.</i>
Died	<i>June 27, 1910.</i>

Robert Emmett, Burke, died in Boston on June 27, 1910. He was injured in an automobile accident in Dorchester on the night of June 19. He was taken to the Boston City Hospital and rallied after the accident, but later he suffered a relapse and did not recover. He was born in Boston 36 years ago. In his early days his parents moved to South Boston, and for many years he lived at 156 M St. He attended the Eliot School, and later the English High School. He studied law in a lawyer's office for a year and then attended Bridge-water Normal School, from which he was graduated in 1896. He entered the Lawrence Scientific School as a sophomore and was graduated in 1899. He served as laboratory assistant in the school in 1898 and in 1900, was field instructor of the Cuban Summer School. From 1896-99, he was 1st assistant at the Bigelow evening school in South Boston, and was principal of the Lincoln evening school in 1899. From October, 1899 to February, 1904, he was junior master in Mech-

anic Arts High School, and was later master in Boston Normal School until January, 1907, when he was made assistant superintendent of schools, to complete a term which expired August 31, 1907. He was reappointed for the term of six years from September 1, 1907. He was a member of numerous societies.

Starting with no advantages except his native gifts, Robert E. Burke at the early age of thirty-six had achieved a position among the foremost educators of the city. It was characteristic of him that he interpreted education not merely as a training of the mental faculties, but in a larger and more human way, as an influence molding the pupil's whole nature, such as could only be exercised by one who was himself a whole man. To make himself such a man, rather than a specialist in one or two fields, was the object of his broad ambition, and few men in Boston have attained a more rounded development of mind and heart, of body and of will. A trained scientist and accomplished out-of-doors man, he was quite at home in the world of books. An adept at many games, he still took life as a task and a fundamentally serious one. The most joyous and humorous of companions, he strewed his path from early manhood with deeds of mercy, never heralded or blazoned from his lips. To a singular degree he avoided excess, and contradicted the familiar motto by failing to display the defects of his qualities. Thus he was original, but not eccentric; courageous, yet never combative; virtuous, with no air of professional virtue; a scholar free from pedantry, a gentleman without affectation or pride. No one who came in contact with him even casually failed to note his personal charm, his rare patience, his capacity for loyal friendship, and, above all, his genuine charity of head and heart and tongue. The lowly revered him, the young held him as their idol, while he walked as an equal among those in high station. Young in years, he was still younger in the unexhausted potentialities of his rich nature. All his intimates recognized a great reserve of strength in Robert Burke, an element profound and even mysterious in the character which seemed, and in fact was,

outwardly so candid and transparent. The best of life, a wider sphere of usefulness—and usefulness was his single measure of success—seemed awaiting this brilliant and pure-minded man, whose memory remains as an inspiration to thousands of friends. May he find many disciples among them. Such characters are needed to maintain the difficult standards of Christian manhood.

School	<i>Cambridge Latin School, Cambridge, Mass.</i>
Years in College	<i>1896-1899.</i>
Degrees	<i>A.B., 1899; A.M., 1903 (1905).</i>
Married	<i>Jessie Sophia Green, Peoria, Ills., June 12, 1907.</i>
Died	<i>March 3, 1910.</i>

Professor Sherman Campbell died at Hanover, Ind., March 3, 1910. His father had been major and most of the time acting-colonel in the 33d Missouri Volunteers and showed his loyalty to the Northern cause and admiration for two of the northern officers by naming his twin sons "Sherman" and "Sheridan." When they were two years old they were taken to Forestville, N. Y., to live, and later to Pennsylvania and Canada, the family finally moving to Cambridge. Sherman Campbell attended the Cambridge Latin School, and was

graduated in 1893. For two years he was in business before entering Harvard, and in the summer vacations was occupied as a bookkeeper in banks. He took no prominent part in the college life but pursued his plan to teach Classics. At graduation he wrote the Baccalaureate Hymn. After that, he taught Latin and Greek in the Hudson River Institute, Hudson, N. Y., and Norfolk University School. He returned to Harvard for part of the year 1902-03, and received an A.M. (as of 1903). Subsequently he was professor of Greek and Latin at the S. W. Kansas College at Winfield, and in 1905-06 at Bradley Polytechnic Institute, Peoria, Ill. In the autumn of 1906, he went to Hanover College, Hanover, Ind., as professor of Greek, succeeding Professor J. B. Garrit. He remained there until his death. In the spring of 1909, he had an attack of embolism in the brain, due to a weakened heart caused by rheumatism. During the late winter term, he had been given a leave of absence from his college duties, and had been to Indianapolis for treatment. Although quite weak, he had not been confined to his bed. He was accustomed to walk out of doors when the weather permitted, and it was while talking to two friends near his residence, that the final rheumatic attack of the heart muscles came. He fell to the ground, and was carried into his house evidently suffering very much. He died soon after. He was evidently very popular with everybody in Hanover, both in and out of the college, and his loss is very keenly felt there.

Since my last letter, I've been reading proof. In the spring of 1910, I was in the employ of Messrs. J. B. Lippincott, Philadelphia, Pa., for a time. Then I read at the Plimpton Press, Norwood, Mass., for a year and four months. Part of my work there was on "The North American Indian" by Edwin S. Curtis. During the next year, I continued to live in Norwood and read proof in Boston. For a time, I was in the employ of the Rand Avery Supply Company, and for a

time, I worked for the F. H. Gilson Company. In January, 1913, I returned to Philadelphia, and read at the Keystone Publishing Company, and the William F. Fell Company. In December, 1913, I came to New York, and read at the Blanchard Press, and at the office of Frederick A. Stokes Company. My work has been varied by teaching as substitute in the Boston school system, and selling books at retail at Strawbridge and Clothier's in Philadelphia. Now I'm reading in the office of Fremont Payne, law printer, 47 Broad St., New York. I do not belong to the typographical union. Occasionally, I meet Harvard men in my field of activity. I heartily wish there were more. I am sorry that I cannot report any progress along matrimonial lines. I hope that the rest of you report quite differently in that respect. I hope to see you all at the reunion in June. '99 greetings to you all. Member: Harlem Y. M. C. A., New York, N. Y.

Address	<i>(home) 1673 Appleton St., Long Beach, Cal. (business) 516 Pine Ave., Long Beach, Cal.</i>

My Senior year and the two following years, I spent with many other members of '99 in attendance at Harvard Law School. I was admitted to the bar of Suffolk County at Boston, February 23, 1901, and practised there till December, 1905. Then, I followed H. Greeley's advice, coming as far west as possible on this continent. I have lived at Long Beach, Cal., for the last eight years. I was admitted to the bar in Los Angeles in February, 1906, and have practised law since then, except when holding public office, for three years as Public Works Commissioner and at present as Postmaster. I have not traveled abroad, but have been over the United States quite thoroughly. After careful consideration of the claims urged by Charles Dennis in favor of Tacoma (Honest!) and by Harry Stowell in favor of New Haven (think of that!) I still believe that next to Boston, Long Beach occupies the most favored portion of the United States. Boston, by the way, when alluded to on the Pacific Coast means the eastern half of Massachusetts. I have been active in politics (democratic and good government brands) and interested in matters pertaining to child welfare. For the last two years, I have been a member of the Probation Committee of Los Angeles County, and was recently appointed one of a committee of citizens to work with a committee of the State Legislature in preparing for consideration of the next

session of the Legislature possible changes in the present law governing juvenile dependency and delinquency. I should be especially well pleased to hear from '99 men on this subject. I have written a few articles for local publications on matters of general interest such as library work, international peace, modern drama, etc., in all of which I am keenly interested. In order to prove the thesis that "Man is a Social Animal" I will say that I am a member of the Harvard Club of Southern California, Los Angeles Bar Association, Municipal League of Los Angeles, Woodrow Wilson Club, Newman Club, Friendly Sons of St. Patrick, all of Los Angeles; Benevolent and Protective Order of Elks, Knights of Columbus and Virginia Country Club, all of Long Beach.

In 1909, I was connected with the firm of George M. West and Company, Detroit, Mich., as a stock and bond salesman. There I remained until September, 1912, and started out as a manufacturers agent which I am to the present moment. Nothing eventful has occurred in my fifteen years out of college. Belonging to the great eighty-five per cent of humanity—that is the poor per cent—I have had a great many moments during which to speculate as to whether or not I would be among the fifteen per cent, had I chosen a profession in '99. The old Elective System, which so many of us delighted in, was bad for me. My oldest son, who should graduate in 1924, promises to be a lawyer. The youngest—probably of the class of 1931 looks like a manufacturer. One

of the greatest; if not the greatest regrets in my life, is the fact, that I have never been able to attend any of the last three meetings of our glorious class. Nor will it be possible this time and year. And to think at the next, in 1924, my oldest will probably be breaking out of college. You will all have a glorious time this year, and I shall be with you all in spirit.

In this Company, I am the treasurer and general manager. Within the past two years, I have been vice-president of the Haverhill Shoe Manufacturers Association, and am now its treasurer. During the last five years, I have been attending strictly to business, that is, to the practice of the law, whenever I could find anyone who would let me practice, and have managed so far to keep out of jail, and the hands of the sheriff. I have recently moved my offices from 30 Court St., Boston, to the Sears Building, and shall be glad to greet any fellow members of '99, either on business or to reminisce on old times. February 7, 1912, a son was born to Mrs. Ensign and myself, whom we named Charles Sidney Ensign, 3d, in the hope of continuing the family name. He was in such a hurry to see his dad that he came two months ahead of time. We provided him with an electric incubator, in which we deposited him for a period of seven weeks, in a temperature of about 94 degrees. At birth, he weighed four pounds; he dropped down to three pounds, three ounces, and then began to grow large and strong. We furnished him with all the necessities of life including a wet nurse, and now he is quite a husky lad with good lungs and nearly a full set of teeth. I have been associated in a small way with my classmates, Childs and Stratton, and with ex-graduate manager of Harvard Athletics Garcelon, in *The Newton Times*, *The Watertown Tribune-Enterprise*, and *The Stratton Press*. Stratton and I also were two of the guys who helped put the "win" in Edwin O. Childs, Jr., last December, when he was elected mayor of Newton, turning a stand-pat republican majority of

between one and two thousand into an independent citizen and democratic majority of 180. Member: Hunnewell Club of Newton, Eight O'Clock Club of Newton, of which I am secretary; Harvard Club of Boston, Newton Golf Club, Harvard Law School Association.

Address	<i>Shawnee, Okla.</i>

After graduation in '99, I attended for one year the Southern Law College in Nashville, Tenn. I emigrated to Shaw-

nee, Oklahoma in 1900, and began the practice of law, according to the very imperfect code in existence at that time. I was appointed deputy county attorney by Hon. L. G. Pitman in 1901, and was elected to succeed him in 1902, my administration being endorsed by another election in 1904. I served as county attorney till the coming of statehood and submitted my name as a candidate for the democratic nomination for attorney-general, and was defeated after a very spirited campaign. Resuming the practice of law at Shawnee, I soon built up a very large practice and reluctantly gave it up in 1912, to again run for county attorney of Pottawatomie county, and was again elected. This is the last year of my present term of office, and I am just starting my campaign for attorney-general of the state. My campaign will be conducted in the true Harvard spirit, absolutely above board and on the square, but with just as much 'pep' as I can put into it. I wish this publication could be delayed just a few weeks so I could record my victory. I am unmarried, consequently have no children, but imagine I am very happy.

After leaving Harvard, I spent the next few years in the

West. I taught in the Hitchcock Military Academy, San Rafael, Cal., the Washington Agricultural College, and the Pasadena, California, High School. I also studied one year at the University of California, where I was a member of two German clubs, the French club, and played on the Chess Team in the inter-collegiate matches. Since 1906, I have been teaching Romance Languages at the Pennsylvania State College. Here I give an annual exhibition of simultaneous chess against all comers. After this the Chess Club generally comes to life and remains in existence about eight weeks. At the resurrection, I have been often honored with the presidency, but the honor is short-lived. Since 1906, I have spent one summer in France, and two at the University of Wisconsin. As for my writings, they consist of short stories, which have an occasional pecuniary (though no literary) value, and a polyglot (French-English) play, written for the Cerele Français. In-as-much as the stories appear under a pseudonym and the play has not yet appeared, the class is requested to defer ordering the laurel-crown until further notice.

Five years don't count so much now for a ninety-niner—we are growing old. I am still after the elusive dollar which is elusive in the electrical contracting game—occasionally a guest, but soon departed, but I have got by all right, and in fifty years or more will be doing very well. The monotony of this pursuit has been broken however, by a connection we have made with C. and E. Fein of Stuttgart, Germany, manufacturers of electric drilling apparatus. In a recent trip to Germany, I found the fact of my membership in the world renowned class of '99. Harvard College, to be an asset in a land where titles and connections cut ice. I am glad to say that I have no births, deaths or divorces to report.

Children	<i>James Boyd, June 9, 1904 (died May 20, 1905); Elizabeth Buffington, March 3, 1906.</i>
Died	<i>Sept. 17, 1913.</i>

When a very young boy his family moved to Fall River, Mass., where he was educated and later attended Browne and Nichols school in Cambridge, before entering college. After leaving college, he went into the Fall River Iron Works to learn the mill business. After a few years he established a chifon mill, which he gave up to take the treasurership of the Barnaby Manufacturing Company, where he remained until he was obliged to give up business. He went to California in 1905 in search of health. He engaged in orange culture at Redlands, Cal., and enjoyed fairly good health for several years. He was a member of the Country Club and the University Club, and was very popular with all who knew him. After an illness of several months, he died September 17, 1913.

Frank Herbert Ford Holt, died in Richmond, Virginia, January 24, 1910. He took the college course in three years, and entered the law school in 1898. After graduating from the law school, he went to New York, where he entered a law

office, and later accepted a position in the law department of the Erie Railroad Company. Early in 1905, owing to failing health, he left the law and went abroad as tutor for two boys. After his return to America, he continued to tutor, spending part of each year at Bridgewater, N. H., where he had a summer camp for boys. In the fall of 1906, he became instructor in English at Dr. MacKenzie's School at Dobbs Ferry, where he remained until his health broke down in October, 1908. In his short life, though handicapped during the last three years by illness, Ford Holt had won a host of friends among his classmates and professional associates. He had a rare talent for guiding and instructing boys, which made him a very successful educator. His was an upright, loyal and sincere character. Letters he wrote to his friends during the period of illness preceeding his death, are as remarkable for their excellence of literary style as they are beautiful in their expression of his love and appreciation of nature; and of his spiritual growth.

Children	<i>Rowell Freeman, Oct. 28, 1912.</i>
Died	<i>Feb. 14, 1914.</i>

Charles Rowell Howe died in a hospital at Brattleboro, Vt., February 14, 1914. When four years old, his family moved to Swanton, Vt., thence they moved successively to Center Ossipee, N. H., and Olean, N. Y., where he entered the High School from which he was graduated in 1894. In 1895, he entered the Lawrence Scientific School at Harvard, which he attended two years. Then, he returned to Olean and worked for his father in the leather business. Subsequently he went to Milford, N. H., as foreman for the Milford Tanning Company, to New Bedford, Mass., as a bookkeeper for a year, then to Walanga, Tenn., as an assistant in repairing, then to Pittsburg, Pa., where he was employed by a leather firm. Thence he went to Danvers, Mass., in partnership with C. A. Parker for a while, and then was employed by the United Shoe Machinery Company, in Beverly for one season, and afterwards secured a position with the A. C. Lawrence Leather Company, as appraiser. After his marriage he went to Sault Sainte Marie, Mich., where he took a position with the Soo Leather Manufacturing Company. Having himself worked out a process in colored leather he began the manufacture of same for the company, which proved to be a success, but after spending six months in the Soo, he was obliged to give up his position owing to the damp climate. He then returned to Boston, where he expected to continue the manufacture of leather, but results were fruitless. Having tired of the leather business, he went to engineering for the Asbestos Protected Metal Company, in Canton, Mass., staying with them for two years, until he saw a better position as an appraisal engineer for the W. A. Wood Mowing and Reaping Machine Company, of Hoosick Falls, N. Y., and was with them two and one-half years, when he completed the appraisal. On the fourteenth day of October, 1912, he entered the office of the American Appraisal Company, New York. After six months, the company appointed him to the engineering office of New England, in which he made good, and was well liked by all of his superiors. At the time of his death, the company was going to appoint him manager of the engineering office in New York, in fact he

was on his way there when taken ill at Brattleboro, Vt. He loved but one sport, and that was lawn tennis. While in Hoo-sick Falls, he belonged to the Country Club, and won a silver cup in a tournament match which was played by the club. He started to write a book on appraisal work, but had not completed it at the time of his death.

Married *Mary Ruth Seymour, Chicago, Ill., Sept. 21, 1907.*

Died *Gulfport, Miss., December 25, 1910.*

Joseph Albert Jones, died December 25, 1910, at Gulfport, Miss. His youth was spent in Bradford, Pa., New York City, and Buffalo, where he received his preparatory education in public and private schools. He entered Harvard in the fall of 1895, became a member of Pi Eta and was graduated in 1899. He expected to take the Harvard Law School course, but ill health compelled him to abandon that plan and he went to Peru to oversee some business interests of his father's and to recuperate. Upon his return to America, he took up various responsibilities in his father's offices in Buffalo and Gulfport, Miss., and became more and more his father's right-hand man till in the spring of 1909, when Captain Jones' health failed, the son assumed the entire responsibility of the Jones' interests. In one year, and a half, he made for himself a reputation that will live for many years. Although young and with small experience, he soon demonstrated his ability and won not only the commendation, but the admiration of his associates and subordinates. The fine traits of his character impressed themselves upon all who knew him. His friends and admirers were numbered by hundreds in all classes of society. He worthily filled the place of his father. In enterprise and generosity he was unexcelled. At the time of his death, he was first vice-president of the Gulf and Ship Island Railroad; first vice-president of the Gulfport Mississippi Coast Traction Company, first vice-president of the Great Southern Hotel Company, president of the Mississippi Coast Country Club, which he founded, a director in the First National Bank of Gulfport, the Hattiesburg Compress Company, and the Niagara Gorge Railroad Company. He was ill only a short time with what seemed to be a mild case of typhoid-malaria, but which developed suddenly into a most virulent attack, and, before his parents and sister could arrive from Buffalo, he had gone to his rest. It is said old men are valued for what they are, and young men for what they

promise to become. Joseph Albert Jones had come to be valued, both for what he was, and for the great promise he gave for the future. Mr. Jones was married on September 21, 1907, to Miss Mary R. Seymour, daughter of Horatio W. Seymour, editorial supervisor of the New York World. Dying in his prime, Mr. Jones was mourned by all who knew him. In Gulfport, for which he had done so much, his passing was regarded as a public calamity. Though gone from sight, his life and his influence live on and in that community where he was so beloved, it is felt that no one can ever quite fill his place.

I am at least in training for any excitement planned, having had three years here, full of it. We are hoping that the

end is soon in sight, and personally, I am very optimistic. It is something to be said—that in spite of all the trouble, our company, employing several thousand men, has never completely stopped its operations, even during a three days' battle in the town itself. You ask for a history of "mer" life, but, I'm like the little school girl on graduation day, who forgot her lines. Why? Because I'm so different from her—I have no lines to forget. In other words, my life has been one of those nondescript ones, pegging away and working, working away and pegging, and so on ad infinitum. I am happily married, but we have no children—unless one can call a mongrel pup, "an child." By the way, should you happen to know of any '99's who have a superabundance of the child article, tell them to ship one or two to us—Mrs. Jimmie and myself will gladly take up the burden. (We would prefer however, those that have past the teething—mumps—measles—stage). Outside of all this, I'm at present in charge of the Credit Department of the Cananea Consolidated Copper Company, and not having yet been fired, take it for granted that so far, my services have been fair to 'midling.' (Entrez-nous, I am the whole department, but it does not sound as well as saying "in charge of"). So in the last analysis, for the class history, just give my name, married to Carmen Padrés, no children, address, (permanent) care of The Old Pueblo Club, Tucson, Arizona, now manager of the Credit Department, Cananea Consolidated Copper Company, (The Green Cananea Company). Confidentially, on June 1st or thereabouts, I hope to launch out in business for myself, with Tuscon, Ariz., as my headquarters. The nature of the business my associates and myself will undertake, will be Public Accounting in all its branches, and Credit Information, with particular attention to business in Mexico. We will have a good field, and with my two partners, who are "cracker-jacks," our undertaking should be ultimately successful. We have already formed several good connections, and our finances will be taken care of by an older brother of mine, now in Havana, Cuba. The firm will operate under the name of Lawton Brothers and Company.

Since 1909, I have married, have acquired a family, and am still keen for the suppression of the appendix and all such surgical visitations of mortals, classmates or otherwise. The calendar tells me that I'm five years older, but to be truthful, I don't feel so in the least; rather five years younger. In all other respects, also, fate, or if you prefer, fortune, has been kind to me. I am looking forward to our coming reunion with much pleasant anticipation; for the privilege of membership in such a splendid and noble a body as the Class of 1899 is as I am constantly aware, by no means the least of my blessings.

After eighteen months in the Tropics. I felt sure that the climate did agree with us, so when the Board of Agriculture presented me with a substantial increase in salary in the latter part of 1910, I resigned my position in the United States Department of Agriculture, and have lived in Trinidad ever since. Most of my time has been devoted to the study of the diseases of cacao, coconuts, and sugar cane and methods of control. One of the most interesting line of work has been an attempt, which has proved quite successful, of controlling one of the serious insect pests of sugar cane by the use of a parasitic fungus. I enjoy life in the tropics very much, though it has its disadvantages as well as advantages. One moving picture theatre and a traveling circus once a year are the chief outside amusements. Of course it is always more or less hot, but never excessively hot, the thermometer at night ranges from 65 to 70, and in the day from 80 to 90 degrees. I have done a little traveling during the past five years visiting Dutch and British Guiana, Venezuela, Colombia, Panama and Costa Rica. I make frequent trips to Tobago, Robinson Cruso's Island, and often see Friday's footprints in the sand. I had five months' vacation last year, three of which were spent in the United States, one in travel, and one at Bocas del Toro, Panama, on a mission for the United Fruit Company. I have a fine little house on a hill just back of Port-

George Leverett Stowell, Jr., died at the Albany Hospital, Albany, N. Y., July 30, 1913. He passed the earlier years of his life at Newburyport and at Yonkers, N. Y., where his father was settled as Unitarian minister. On the latter's retirement from the ministry because of ill health, the family spent a few years at Portsmouth, N. H., and then moved to Lexington, Mass. There our classmate was prepared for college. He was educated entirely by his father, and by private tutors. He entered Harvard as a special student in the autumn of 1895, and was transferred to the class of '99 the following year, but he left college at the end of his Sophomore year, and entered the employ of Wood, Harmon and Company, real estate operators in New York City, with which firm and its successors he continued until his death. He was first employed as a salesman and rose rapidly through his energy and ability. In 1898, he took charge of the business of the firm in Richmond, Va., subsequently returning to New York to take charge of the selling department of the office there. Largely through his resourcefulness, that department expanded from a purely local institution to one that reached all parts of the country. In 1908, he was taken

into the firm, thenceforth known as William E. Harmon and Company. He was a member of the Harvard Club of New York. He was most loyal to Harvard, strong in the faith of what it could do in the upbuilding of a man, and looking forward with eagerness to the day when, in his sons, he would have representatives of himself within its walls. His wife and three children survive him.

I resigned my position as teacher of English and history at Clarke School, Northampton, Mass., in 1910, to accept an instructorship in modern languages at Tufts College. The year 1911-1912, found me in Baltimore, Maryland, where I taught French and German in the Baltimore City College. Going to California in the summer of 1912, on a visit to relatives, I decided to accept an opening in modern languages in the Hollywood High School, one of the seven high schools of the Los Angeles School District. This last February, I received the appointment to the headship of the modern language department. Educational questions are much alive in this section of the country. I have been secretary of the High School Teachers' Association of Los Angeles for two years, and am at present vice-president of the Germanic Section of the Modern Language Teachers' Association of Southern California. I have written: "United Babylon," a skit for the Faculty Mens' Vaudeville, H. H. S. There are no unusual incidents to relate in my life history

since the last report. I don't remember having been away from the daily routine of my work in the past five years, either through illness or for even a vacation. The first page of this sheet will perhaps explain that. The demand for more clothes and shoes, and the increased cost of living, have kept the nose close to the grindstone. Two fine children have come to keep the others company. They are all that the others are, and that is saying a good deal. I do not believe in race suicide. I have kept up my interest in my profession and moved on a pace. To accept other appointments, I resigned from the Presbyterian and Roosevelt Hospitals, and took up the position of Chief of Clinic in Orthopedics and Adjunct Attending Surgeon at Bellevue Hospital, Assistant Chief of Clinic, Orthopedic Department, at the Vanderbilt Clinic and Clinical Instructor in Orthopedics at Cornell Medical School, and Instructor in Orthopedics Polyclinic Hospital Medical School. I have retained the position of assistant surgeon to the Ruptured and Crippled Hospital Out-Patient Department, and am Consulting Orthopedic Surgeon to the Lincoln Hospital and the Lawrence Hospital in Bronxville, N. Y. I have written since 1909: "The Importance of the Treatment of Teeth in Children," "The Treatment of Rheumatic Arthritis by the Injections of the Extract of Pituitary Body," "Treatment of Potts Disease." Louis Thornton Wilson

School	<i>Worcester Classical High School, Worcester, Mass.</i>
Years in College	<i>1895-1898.</i>

Died	<i>June 17, 1909.</i>

Dr. Louis Thornton Wilson was born in Webster, Mass., January 15, 1876, the son of Louis N. and Anne G. Wilson. His father was born in England, came to this country in 1871, but went back to England to study in 1884, so that Louis spent a part of his boyhood in that country. Coming back to America in 1888, the family settled in Worcester, Mass., and it was from the Classical High School of that city that Louis entered Harvard College. He graduated with the class of 1899, having entered the Harvard Medical School the previous year. After taking his medical degree in 1902, he spent a year as surgical house-officer at the Children's Hospital in Boston, and two years at the Boston City Hospital in a similar capacity. During the last four years, he has been engaged in the practice of his profession in Boston, and a little more than a year ago he was chosen to the surgical staff of the Boston City Hospital as its youngest member. His death occurred just as he was beginning to assert himself in his profession and his ability and fitness for his work were only beginning to be recognized. He had a clean-cut and definite perception of the goals he was ambitious to reach, which, with his industry and love of the work, would have carried him far. He loved his world and the people in it as well as his work, and his joy in life was beautiful to see. Man, woman, child, animal, all recognized in him a sym-

thetic friend, and his eagerness to respond to every call upon him and to heal anybody who asked for his aid or sympathy became a matter-of-course to those who worked with him. He would have become a wise, conservative and loyal adviser to many people. He died an unselfish, sweet-souled, gentle-minded man whose place in the hearts of those who knew him well will never be filled.

DR. PAUL THORNDIKE.

Boston Medical and Surgical Journal, July 1, 1909.

Resolutions on the death of Dr. Louis Thornton Wilson: Louis Thornton Wilson's death came with peculiar bitterness to the City Hospital Staff. He was one of our own, by training, tradition, appointment and promotion; he had worked with us and was to have worked for many years to come. For these reasons, as well as for others of a personal nature, his death afflicts us with exceptional pain. He was the last surgeon appointed to the staff; a hard worker, much in earnest, charitable and kindly in judgments, and absolutely loyal. As we look back, he seems perhaps to have been too tireless in his duties, too ready to continue without relaxation the wearying daily exertion of hospital and professional service. He possessed a personal sympathy, an interest in the affairs of his comrades, which made the name acquaintance ripen rapidly into the name of friend. Against more than the usual obstacles he made his way; and in his success he left no bitterness behind in the hearts of his comrades. He was tolerant of the beliefs of others, but firm in his own, a capable surgeon who had won his place, a thoughtful gentleman who looked into the future with quiet confidence. A verse of Kipling's seems singularly appropriate:

“He scarce had need to doff his pride
 Nor slough the dross of Earth.
 E'en as he trod that day to God,
 So walked he from his birth,
 In simpleness and gentleness
 In honor and clean mirth.”

For these virtues his character commends itself to him associates, and it is hereby resolved that these minutes be spread upon the Records of the Surgical Section of the Boston City Hospital Staff and in the columns of the Boston Medical and Surgical Journal.

In July, 1895, I entered the law office of Harwood and

Maders in Keeseville as clerk and studied stenography at McAuley Academy, Keeseville. About October 1, 1895, I entered the employment of Rowe, Van Kirk and Pyrke, lawyers, at Port Henry, N. Y., as stenographer. I remained in this office until December 31, 1897. I entered Albany Law School in January, 1898, and completed the course in January, 1899, passed the state bar examination in January, and was admitted to practice in March, 1899. I received my diploma of graduation from Albany Law School in June, 1899. In March, 1899, I commenced the practice of law in Keeseville, and at various times was a member of the firms of Hewitt and Wolcott and Mason and Wolcott, and for several years practised alone. I was associated with S. E. Maders in the practice of law during the years 1905 to 1912 inclusive. On December 31, 1911, I withdrew from the firm of Maders and Wolcott, and resigned from the practice of law to accept a position as district superintendent of schools for the first district of Clinton County, N. Y., which position I still hold. I was elected school commissioner for the first district of Clinton County in 1902, for three years, commencing January 1, 1903, and re-elected until the office was abolished in 1911. I am a member of the Knights of Columbus, the Independent Order of Foresters, the Knights of the Maccabees, the St. John the Baptist Society, the L'Union St. Johns, the Harvard Alumni Association, the New York State Bar Association, and the State Association of District Superintendents of Schools of which I was president in 1913-14. In November, 1913, I was appointed by Governor Glynn of New York, as a delegate to represent the State of New York at the third annual convention of the National League of Compulsory Education Officials at St. Louis. I was trustee of the village of Keeseville for five years, and after a lapse of several years was again elected, and am now acting as such trustee. In politics, I am a Republican.
